

BUILDING FUTURES

Mulambo School Project

WHAT IS BUILDING FUTURES?

We're an NGO based in Lusaka, Zambia and we have a passion for improving the lives of underprivileged children.

Children are, after all, the future and a good education prepares them for it in many ways.

Around Zambia, community schools provide education for those who, for a variety of reasons, don't have access to state education. A large part of our work is constructing new schools – with water and clean toilets. In rural areas of Zambia, public schools are often very far away making it difficult for children to attend school.

In some places communities have set up temporal structure sfor children to attend class but these are often in poor condition lack basic teaching resources and equipment such as books, chalks or pens.

We locate such schools and build new facilities to give children a conducive place of learning.

Our approach is to be holistic and sustainable. When we work in a community we involve the whole community and try to understand their needs and problems before we dive in. We also like to make changes that have a lasting effect.

We visit a potential school many times before the project starts to meet the staff, community and pupils, to make plans and take measurements. We also love to have fun with the kids and inspire them to focus on school.

Our team is made up of Zambian and international volunteers and anyone else who shares our passion. As a small and dynamic team we love bringing a fresh approach to charity. Using social media and online videos allows

us to spread the good news of our work far and wide and reach supporters all over the world. It also allows us to thank those same supporters by giving their generosity the exposure it deserves.

Our support comes from donations of both money and building materials. We also undertake commercial building projects to raise funds. As a small organisation, we have few overheads and donations are used very efficiently.

Our next project is Mulambo Community School in Chikankata district. Let's check it out!

MULAMBO COMMUNITY SCHOOL

Mulambo Community School is situated in the Southern Province of Zambia, off Chirundu Road. This is approximately 75KM from Lusaka's Town Centre. The school is in a village called Mulambo, near the Gorge of the Kafue River.

In mulambo village there are over 150 children learning in the open air, which makes it difficult for children to attend class and/or concentrate during the rainy season, the cold season and during days when there is intense wind current.

The nearest government school is over 6 kilometers away and children in this area would have to climb over a mountain to get to it. Alternately the community in the area decided to start a community school since most of their children can't walk that far anyway. There is a retired old

man who is a retired teacher in the community that offered to volunteer to be teaching the children. The parents to the children make small monthly contributions to support the teacher and to buy teaching requirements for Mulambo Community School.

Late in 2017, a man from the community came across our facebook page and contacted Building Futures to help them construct a better school infrastructure that will make learning for the children much more comfortable and safe.

When we visited the site we found that the children and the community indeed need the help they asked for and we then selected Mulambo as our next project. Mulambo village is one of the many areas of Zambia which face education challenges.

The other we noticed was that the entire village had no source of clean and safe water. Fortunately, a local donor learnt of our intention to provide a source of clean water and decided to sponsor a borehole drilling and the installation of a hand pump.

THE PRESENT

THE FUTURE

Classroom with no floor and desks. Children sit on stones.

Teacher has no proper supplies and no black board. Current board is a metallic plate.

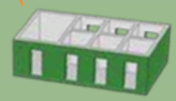

Pit latrine almost full and smelly. No hand washing facilities outside for after use wash.

BUILDING FUTURES

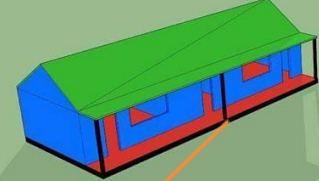

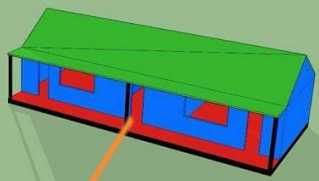

PLAYGROUND

New toilet block with staff facilities

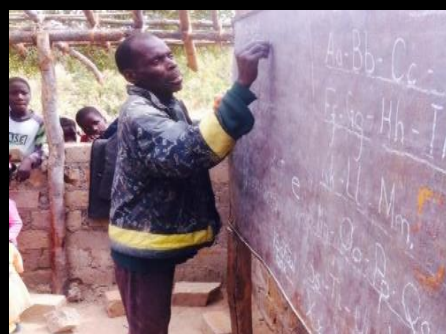

Water tanks and hand washing basins outside

2X2 Classroom block with staff office and resource room

New desks, furniture and boards inside classrooms, staff office and resource room

Mulambo in pictures

HOW YOU CAN GET INVOLVED

DONATE TOOLS OR MATERIALS

1 Help us by contributing the tools and materials we need for the project.

DONATE FUNDS

2 Help us by contributing money to buy building materials, school equipment and cover other costs.

VOLUNTEER

3 Join us on the construction site and get your hands dirty!

By choosing to support this project you'll be ensuring better education, and therefore a better future, for the 150 kids that will be able to attend school at Mulambo School and the hundreds or thousands of others who will attend it in future years. It's a lasting legacy for the children of Mulambo village.

On the left are a few of the ways you can help us but we're certainly open to ideas. If you can think of another way to get involved, please get in touch. Our contact details are on the back page of this brochure – you can email, phone or find us on facebook.

We believe in thanking any individual or organisation that helps us by giving their good deed plenty of exposure. If you or your company would benefit

from some good publicity, we'd like to give you lots of it.

We'll display your logo prominently on any marketing material we produce, including this brochure. This might include posters, flyers and desk calendars. We'll also put your logo on our website.

We're planning to make a reality TV-style series of videos about the makeover and your organisation could feature prominently. We'll be circulating the videos far and wide on the internet and have plans to approach **Zambian TV** companies.

There will also be tonnes of photos! Why not come down for a photo shoot and make yourself a part of this exciting event.

WHAT WE NEED

These are some of the building materials and other items we're looking to obtain for the project:

- Cement
- River Sand
- Building Sand
- Building stones
- Blocks
- Flat Stones
- Plaster
- Force Wire
- Door Frames x 6 large and 5 toilet (Steel)
- Window frames
- Red Bricks (windows)
- Glass
- Roofing sheets
- Pipes/Beams
- Timber
- Doors (Mukwa) - main building
- Doors (Flash) – toilets
- Wood preservative
- Blackboards
- Notice boards
- Padlocks
- Self Tapping screws
- Nails - steel & wire
- Roofing nails
- Wires
- Paint
- Air vents
- Toilet pans
- Baisins
- Taps
- Pipes
- Tiles (office floor and toilet)
- Tilefix
- Filler
- Shower head + pipes
- Swings, roundabouts,
- Seesaws, slides, climbing frames
- Hand washing basins and water tanks

Thanks For Reading

Thank you so much for taking the time to read about our project and we hope you are excited about it as we are.

If you need any more information or clarification, or would like to meet with us, please don't hesitate to get in contact using any of the details on the back of this brochure.

Thank you again and we hope to see you soon.

BUILDING FUTURES

HOW WE CAN HELP YOU

We'll shout about your support to our large following on facebook.

Be apart of our reality-TV style video series.

Bring your team down to feature in our Mulambo photo-shoots.

Thank you
