# Help a Child Get Back to School

THE NGAO FOUNDATION

Being in school can be an important factor in helping them reach their goals in life, as it can provide them with the necessary tools, resources and knowledge to be of benefit to their families and the local community. Education can open up new opportunities and enable them to explore new possibilities, allowing them to make the most of their potential and become valuable assets to those around them.

Empowering youth with skills that will change the perception of  
themselves and that of the community
