U-Dream Global
Where dreams become reality

BACKGROUND

In early 2018, Megan Werner founded U-Dream Global, a non-profit organization and ambitious aviation outreach initiative that fosters visionary thinking, inspiring young people to pursue their dreams while promoting and supporting innovation, technology and entrepreneurship as necessary key drivers for Africa's development and transformation.

Under the guidance and supervision from The Airplane Factory, U-Dream mentors and five team leaders from Denel Aviation, twenty inexperienced teenagers from diverse backgrounds across South Africa, built a Sling-4 aircraft in a highly controlled environment within three weeks in June 2018. Following final inspections and flight certifications, Megan and various teen co-pilots are now set to fly the light aircraft from Cape Town to Cairo and back from June 2019, visiting several African countries and impacting thousands of lives during the project.

WHAT IS U-DREAM PROGRAM?

U-Dream Global's Cape to Cairo Programme is an ambitious aviation outreach initiative that fosters visionary thinking, inspiring young people to pursue their dreams while promoting and supporting innovation, technology and entrepreneurship as necessary key drivers for Africa's development and transformation.

The programme creates safe real-world experiences, specifically designed to discover young people's strengths and accelerate their growth. Through effective training, U Dream Global equips the youth with success tools and methods, forming a solid foundation which enables them to create a powerful future. This is a great achievement and they are proud to represent this country.

OBJECTIVES

1. To help foster visionary thinking, inspiring young people to pursue their dreams while promoting and supporting innovation, technology, and entrepreneurship.
2. To engage youth in different countries across the targeted destinations for a “dream African child” motivation engagement

WHEN & WHY?

The trip starts on the 12th June 2019 and will take more than a month. Sponsorship components will be ongoing as the Challenge rolls out

Thousands and thousands of children across the African towns and cities to be visited will benefit immensely from the Challenge via meetups, motivational seminars and interaction to be included in future U dream Global initiatives that touch on innovation, technology and entrepreneurship

SPONSORSHIPS

Sponsorship for the following will be most welcome:

- Fuel for the trip
- Balance of the PPL hours for the 2 pilots
- An MPI service during the trip if we go over the 100 hours.
- Accommodation for the crew and support team about 10 people.
- Commercial flights for four support members on a commercial operator.
- CAA negotiations to make things easier in the various countries.
- Accommodation for the support team on the ground across the African cities
- Event Management components in the respective African towns and cities to be visited
- A drone for the use of the trip
- 4 x Go Pro cameras
- Lots of odds and ends.
- Anything else we may have forgotten.
- Loads of moral support and encouragement.
