臺灣嚮光協會

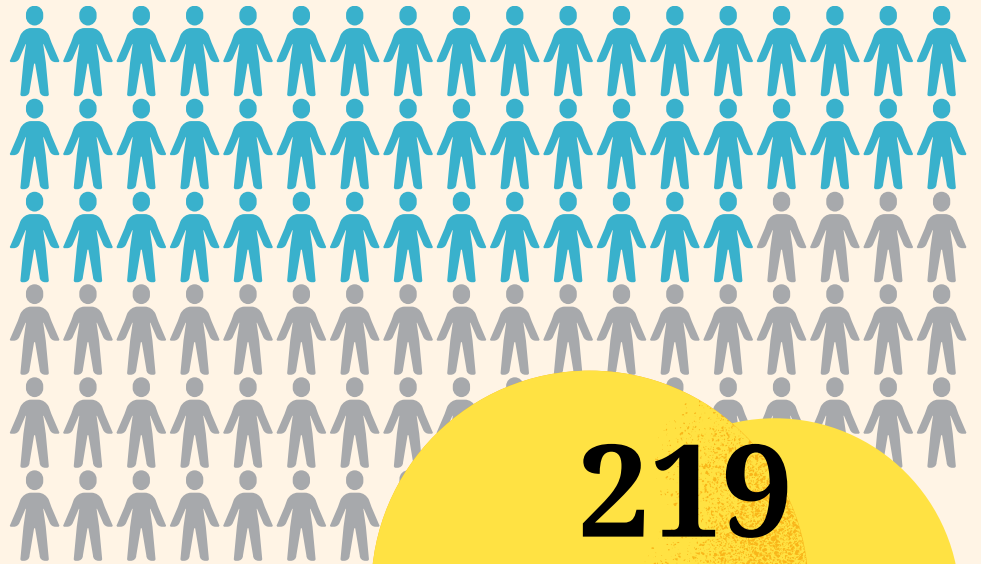

2023 PLANT-BASED MEALS

Since our inception in 2012, Bright Side Projects pioneered in providing plant-based meals for communities in Taiwan. We have programs that aim to make this an engaging and interactive experience so make each experience more memorable. This includes [Kids in the Kitchen], where kids cook not only for themselves but for the community, [Culture through Cuisine], one of our creative education workshops in which kids learn about various cultures by creating plant-based versions of their traditional meals, and also delivery of plant-based food staples year end by working with plant-based vendors such as SUIIS. This year in addition to ChingChuan and Taitung, we were happy to add a summer camp with the indigenous youth at Wulai as part of our outreach!

Even if the workshop or activity falls outside the specified programs, we still prepare plant-based meals for the children in our workshops. This year we were fortunate our partnership with Omnifoods to substitute fish and chips with delicious veganified versions at our Vast x Ocean Conservation and Surf Camp and long time friend Vegan Heaven, bakery turned organic rice farmers deliver food staples. Year end we also had our communities bake doggy treats to donate to Mary's Doggies, showing them the spirit of the holidays is best when shared and giving back to others!
