Sweet Mother Program Activity Report

Bola arrived in labor at night at a community health center with nothing to deliver her baby except a birthing kit that Sweet Mother Program had given her. In this emergency situation, the nurses on duty used the birthing kit to take the delivery of a baby girl safely. The nurses cut the umbilical cord with the scalpel in the kit. And the baby had its first birth with the soap in the kit.

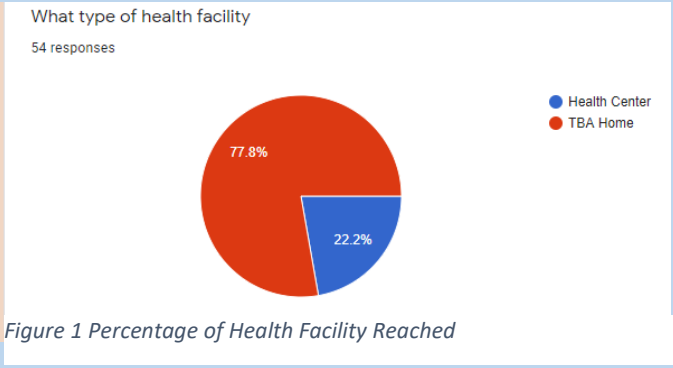

Figure 1 Percentage of Health Facility Reached

Your donation helped Sweet Mother program in the past months as reach 10 community health centers and over 50 Traditional Birth Attendants in our effort to reach over 860 poor pregnant women and nursing mothers. Sweet Mother Program deliver 90 talks in the health centers on topics including; sex during pregnancy, family planning, breastfeeding, weaning foods. Micronutrients such as Vitamin A, Multivitamin, Albendazole were distributed.

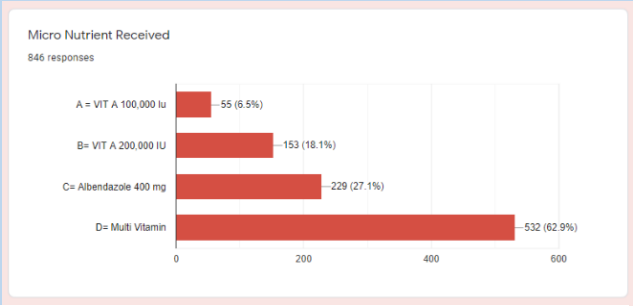

Figure 4 Number of Micronutrients Distributed

Your year-end donation will guarantee that more babies of poor mothers have safe deliveries and good birth weight. Your donation helps to pay for transport to the hard to reach health centers, pay for courier delivery of birthing kits and buy foodstuffs for demonstrations on nutrition. Your action now to donate will go directly to ensuring improved health outcomes of mothers and newborns. Make your donation today at http://goto.gg/41818

You are our trusted partner in the fight for improved health outcome of poor mothers and newborns. Your gift today will help put us over the top before and beyond December 31.
