

## **SAVING LIVES WITH DIAGNOSTICS, TREATMENTS AND TECHNOLOGY**

**Olga Lorena is a professional woman, active, mother of Juan Martín, a 7 years boy.**

**But in one night everything changed. She lost her health and almost her life... Thanks to the expertise of a gastroenterologist and the technology of the Hospital Pablo Tobón Uribe, Olga Lorena reborned and has a new opportunity to live a happy and plenty live.**

**November 27 of 2018, a day like any other in Olga Lorena's life, except that she went to sleep at night, and didn't woke up the day after. She was in a coma.**

Lorena was taken to a hospital and diagnosed with a pancreatic insulin issue, caused for a mass on her pancreas. After coming back of the coma, doctors presented several options of treatment, each one with high repercussions in her quality of life

All but one: Doctor Gabriel Mosquera gastroenterologist at the Hospital Pablo Tobón Uribe presented her a different treatment choice: with an specialized endosonography usually used in diagnosis of cancer, Doctor would be able to retire de tumor of the pancreas without collateral effects. This was how, thanks to Doctor's Mosquera experience and the technology of the Hospital Pablo Tobón Uribe, Olga Lorena received a second chance to live her life!!!

- **This story had a happy end, thanks to people like you!**
