GREEN ECO-NETWORK

BROCHURE, ISSUE 1 of 2017/18/19

Partnership with the National Government local Administration has worked well for Green Eco-Network. We celebrate the World Environmental Day with the Local Administrators for the benefit of the Community. The Community reciprocate by volunteering labour in such events. We celebrate the many achievements Green Eco-Network has accomplished within a couple of years. Our focus has been Environmental Conservation, setting up tree nurseries, tree planting, Scheduled Environmental clean-ups and educating the community on best mitigation practices towards Climate Change.

VISION: We are committed to a sustainable future and to improving the social and environmental well-being of the community.

MISSION: Our mission is to create cleaner safer neighborhoods in which we live by working together with our neighbors to improve our local environmental quality.

OUR ECO SERVICES INCLUDE

Environmental Conservation	Environmental Clean-ups
Tree planting	Climate Change Mitigation

Green Eco-Network Pillars are the guiding principles of or Millennium Goals towards the flagship Project of Vision 2030.

Afforestation as a conservation method has been our theme of last two years. We have reclaimed 50% of the sem-arid areas of Utawala and Embakasi. We have presence in the remote parts of the Nairobi County. We are committed to continued efforts of reclaiming the lost soil cover to enhance economic levels of our community. The community effort is paramount through volunteership. Donor participation will enhance our efforts.
