

Pan African Christian Exchange (PACE) is a growing ministry based out of Nyahururu, Kenya that we are partnering with. Their aim is to equip the poor with affordable, quality education and health care. One of their main branches is Pan African Academy(PAA), a private Christian school founded in 2003 and is located about 4 hours from Nairobi. PAA provides an integrated academic and social environment from nursery to college with intention to inspire a desire for self rule, self sustainability and personal responsibility. The school also provides spiritual, academic, social and moral needs of marginalized and needy children in society including orphans, street kids and children from minority tribes in Kenya.

There are 2 projects that GUD will partner with them PACE on. The first smaller project is helping to finish the wash stations.

PAA began the construction of two wash stations for their students in the spring of 2018 but were unable to complete them due to financial constraints. Currently, there is only ONE water spigot that services the entire student body comprised of 200 young scholars.

We want to help them complete the wash stations and prevent illnesses and bacterial diseases that are too often contracted by the students.

The wash stations will be used for hand washing, washing laundry and dishes.

Funds raised will be used directly for supplies needed in the construction of the wash stations.

These would include:

- Faucets
- Plumbing
- Masonry work
- Tiling

PAA is a day and residential private Christian school in Kenya, East Africa. The school was founded in 2003 and is located in Central Province, Nyandarua North District, Ol-jororok Division, Gatimu Location. PAA is one of the 4 schools that comprises of Pan African family of schools which reside in one compound and are managed by a single administration. These schools are: Pan African Academy, Pan African High School, Pan African Vocational College and Pan African School of Theology. PAA is mandated to provide an integrated academic and social environment from nursery to college that will inspire a desire for self rule, self sustainability and personal responsibility. The school is also expected to provide spiritual, academic, social and moral needs of marginalized and needy children in society. Specifically, these venerable children include orphans, street kids and children from minority tribes in Kenya and the great Lakes region.

We welcome all donations and we appreciate your support!
