

## **ABOUT CHANGING TIDES FOUNDATION**

CHANGING TIDES  
FOUNDATION

Changing Tides Foundation was born from the simple idea that the world would be a better place if more people had the opportunity to give back while on their travels. Established in 2016 by a group of female surfers and adventurers, Changing Tides Foundation connects global travelers with local causes. We do this by teaming up with local organizations in communities around the world to address social, environmental, health and safety concerns depending on the needs of that specific location, because TOGETHER WE ARE BETTER.

Our mission is to bridge the gap between travelers and our global partners and projects, paving a way for travelers to SERVE NATURALLY, offering them the ability to have a life-changing experience while on their own journeys. We also collaborate with eco-minded brands, encouraging travelers to ADVENTURE CONSCIOUSLY using eco-friendly and reusable gear, leaving behind the smallest footprint possible while on their travels in order to preserve the beauty of the places visited. We also aim to protect our oceans and wildlife by educating others on how to use less plastic in their daily lives to reduce pollution, climate change and eliminate marine debris.

To date, Changing Tides Foundation has projects underway in Mainland Mexico, Panama, Dominican Republic, Sri Lanka, Oahu, Peru and the Caribbean while the team is working with ambassadors to expand our global. To learn more about future projects, the team, our mission, and our partners, visit us at <https://www.changingtidesfoundation.org>.
