

# GRACE HONDURAS FACING A WORLD PANDEMIC

***"Either we die from the virus or we die from hunger"***  
**- José, second grade Grace student**

For 215 students who work in the trash dump, at Grace Project, two months off class is not only delaying their studies but two months without a clean and proper meal. Support Grace through this time of uncertainty in:

## FEEDING OUTREACH PROGRAM

We have been giving away food provision for all of our families through all of this quarantine period. Most of our students eat food they have found in the dump, due to not having anything to eat in their houses.

We still need to cover breakfast and lunch for our 215 students, having a weekly budget of \$300.

## DISTANCE EDUCATION

We continue with the school period through homeschool programs and virtual platforms. But the school year is just beginning and through quarantine time we are spending more supplies (due to distance education).

Support our mission to provide free quality education with \$200 **monthly**.

## COVID-19 PREVENTION KIT

To be able to provide awareness in the trash dump community, we added in our annual budget, hygiene supplies to prevent Covid-19 spreading. With a budget of \$250 **monthly**, to provide a prevention kit to all of our families and cleaning supplies in our school.

**Building dreams, recycling lives**

**Support  
Grace**

# GRACE RUNNING THROUGH THE 4TH INDUSTRIAL REVOLUTION

Even though coronavirus has taken more time than estimated for us to cover in our budget, basic services are into our four emergency needs. Electricity and internet prices are a considerable cost. Mainly because our educational vision is to provide technological, innovative and personalized education. With a \$500 **monthly** budget, who will help us provide internet for students.

Grace Honduras is a Non-Profit dedicated to fulfill the integral needs of families who live and work in the trash dumps of San Pedro Sula and Tegucigalpa. We have 215 students from preschool to seventh grade, in our scholarship program we have two girls in high school and two in university.

We serve them with education, feeding outreach programs, healthcare, micro businesses creation for mothers, emotional and spiritual support, house construction, legal support to get birth certificates, crisis intervention and different donations.

*"For our students  
"stay at home" only  
makes sense  
when they have food  
on their tables and  
hope for their  
future." – Pastor  
Jeony, Grace  
Director*
