

We provide daycare for children between 18 months and 6 years old. In the daycare, the children are provided with a safe and clean environment, healthy food, medical care and education. The aim is to stimulate the children to develop themselves early, so they will have better opportunities in the future. Taking these children in simultaneously gives their parents the opportunity to earn an income and improve their family situation. Through providing a safe place for children and guiding their parents, we strive to help the family break out of the poverty cycle permanently.

In exchange for a safe and clean environment where the children can develop, the parents commit to follow a family action plan, created together with a qualified social worker. Part of this plan are workshops and home visits, through which parents are taught important life skills like money management and pedagogics, as well as language skills and vocational training. Ultimately, through this plan we empower the parents to such an extent that they are able to provide for their family, without needing the child as a source of income, but permit him or her to enjoy basic children's rights like education and the opportunity to develop.

PROVIDE LIFE-CHANGING SKILLS TO CAMBODIAN PARENTS

BUDGET

Description	Monthly	Yearly
Compensation for one parent	\$160.00	\$1,920.00
