RE:CODED

ABOUT US

our history

Re:Coded is nonprofit organization registered in the United States, with operations in Iraq, Turkey and Yemen. Our mission is to prepare conflict-affected and underserved youth to enter the digital economy as software developers, entrepreneurs and tech leaders in their communities.

Since 2017, we have trained more than 500 children and young adults how to code. Over 88% of our graduates, seeking employment after graduation find technical work within 6 months. Our activities include coding bootcamps, entrepreneurship training, a co-working space, and tech workshops and events.

OUR IMPACT

Reach
2971

THE RE:CODED EFFECT

EDUCATION THAT DELIVERS
Students gain the technical and power skills they need to work as web or mobile developers in the best companies locally or abroad.

COMMUNITY
Our innovative program is centered around collaboration and creating a powerful lifelong network. Every month, we host speaker sessions and workshops so students can actively build their network throughout our programs.

CAREER ORIENTATED
We provide our students specialized career prep and apprenticeship opportunities to ensure that they're ready to launch their careers as developers and entrepreneurs.

OUR PARTNERS
We partner with some of the world's leading organizations who support our mission to up-skill and empower youth through coding and entrepreneurship
