

We can do it if we work together!

We have a lot of good news.

We are very happy to see all the progress that is happening at Ananda. We started 2022 with a lot of excitement, classes have been able to continue normally, the children are working in the Montessori environment, doing activities in the garden and exploring the forest.

In March we had a visit of a circus at our school. The children were very excited to receive workshops in juggling, balance, coordination and to enjoy a great circus performance in the municipal auditorium together with many children from the community.

Also, we want to share our joy that for the first time the municipality has invited us to participate in the "Mother's Day" festival that takes place every year in the municipal auditorium of the village together with the educational institutions of the community. The children were very motivated to attend this evento, where they had a special participation presenting "History of dance in Mexico, essence and diversity" a story that represents the origin of dance and the cultural diversity that exists in Mexico since its origins; likewise, we can show this multiculturalism that we have as a school and work on equality, love and respect for others. This experience has strengthened the bond between the school and the community and motivates us to continue creating these bonds of coexistence and participation of students beyond their work spaces.

We are working through the sense of unity as a means to achieve our goals. We are resuming the programme of workshops for parents where we address different topics, such as the principles of the Montessori method looking for examples close to their daily life, strengthening the connection between parents, school and child.

For us it is very important to maintain constant communication and collaborative work with the parents, that they have an active participation in the school. So we can achieve a better work with the families and the children feel fulfilled at home and at school.

One of the things that fills us with joy and gratitude is that we have finally achieved the new roof of the school. With this we can be calm to receive the first heavy rains of the year. Before we were always worried about having to cover all the materials with plastic or keep our books in boxes so that they could be safe. Today we can only smile and say thank you. Thank you to everyone who collaborated in this great work, to the parents who were working together to find the best solution, but above all thanks to you, the donors, who were a very important part of this work, because without your help it would be difficult to achieve it.

With your help we can continue to give life to this beautiful project! The children continue to develop holistically and learn happily for who they are, different and unique, this is the most important thing.

Your contribution makes a difference and only working together we can achieve this.
