PATIENT RELIEF MISSION

HELP TRANSPORT 7000 WOMEN FOR CANCER TREATMENT PROJECT

March 2020 REPORT

Who we are

We are A Ray of Hope for Cancer Victims

Patient Relief Mission exists to improve cancer care and management of female patients and their care-givers by providing hostel accommodation to those who come from rural areas in order to receive their treatment from the Uganda Cancer Institute who otherwise would have no-where to stay in the city while undergoing treatment. Patient Relief Mission was founded in 2016 with the aim of ending the needless suffering for cancer patients in Kampala, Uganda.

Achievement

Our programme is a new venture in Uganda, where there is only one treatment place for cancer that is Uganda Cancer Institute situated in Kampala. Most patients come from as far as 400kms a way for treatment and yet the institute does not provide accommodation in terms of patient wards hence ending up on verandas with no-where to stay while undergoing treatment. All our initiatives run in partnership with the Ministry of Health Uganda and Uganda Cancer Society.

The Challenges

Different cancer patients are given specific diet requirements by health professionals. Patient Relief mission has however been able to generalize the meals due to lack of finances which has caused setbacks towards the achievement of our

objectives of cancer care and management. We intend to start giving specific diet to different patients as per Doctor's specifications to enable us to catchup and achieve our goals and objectives in an effective manner.

Conclusion

We strongly believe that together we can give means of treatment and survival to Cancer patients. Thank you for your support to Patient Relief Mission and the female Cancer patients in need. To donate go here: <http://goto.gg/43833>

We thank you for your continued support that is enabling us to make an impactful difference to the vulnerable patients under our care
