CANDLES OF HOPE UGANDA

About
We strongly believe the best place for a child to grow up in is with their family; the people who know them best. We also know that there will always be circumstances when a child is unable to live with their parents, either because their parents have died, abandoned them, or gone away to work.

Candles of Hope Uganda plays an active role in building strong support systems within families and communities so that when girls are in difficult situations, they can remain living within their family or community. To help ensure this, Candles of Hope Uganda addresses complex, ever-changing, and often interlinked factors, such as poverty, illness, family violence and breakdown, addiction, unemployment, migration, and debt. Our team workshops every difficult situation to ensure we come up with the best plan for keeping girls with their families or within their community.

Mission
Our mission is to strengthen individuals, families, and communities by transforming lives and providing a path to a brighter future.

Serving the Children
In Uganda, village schools are free and open for all children. All a child needs in order to attend is a school uniform, a bag, a ruler, a rubber, a pair of shoes to protect their feet, and an umbrella to keep dry in seasonal rainy weather conditions. Unfortunately, many families are not able to provide the most basic of things for their children. The tragic result is a child who goes without an education.

Candles of Hope Uganda aims to transform lives by providing those basic items a marginalized child requires to attend school. We provide school fees, educational materials and supplies, shoes, and a uniform and sweater to underprivileged student-aged girls and boys in the rural regions of the Kabale and Kasese Districts so they may be able to develop their educational standard. Our vision for all children is to see them educationally equipped to participate in the development of their society.

What We Plan to do in the Next 5 to 10 Years
On top of providing basic items for underprivileged children to attend school, we also have a vision to see families who live in absolute poverty become empowered. Under proper guidance, we believe the following steps can be taken towards our cause of family empowerment:

1. Children’s Feeding Program
Nutrition is vital for a child because it affects physical and mental development as well as helping to prevent and overcome illness. Feeding children nutritious meals opens the door to a healthy life and gives children and their families a sense of hope for their futures. Many of the children enrolled in our program do not have enough food for a meal at school. Candles of Hope Uganda seeks to remedy this by providing clean water, job education, and training. Our aim is to
enable children, families, and communities to live a healthy life and be free from poverty and
hunger.
By breaking the cycle of poverty and hunger, we believe children, who are essential members of
their communities, can become leaders who bring positive change to their countries. To
accomplish our goal, we use the daily meal as a starting point to build strong, loving
communities that have clean water, healthy living environments, education, and livelihood
opportunities.

Our Approach
➢ Nutritious Meals
We plan to provide nutritious meals and monitor the health and growth of children each day
in Karusandara Subcounty in the Kasese District and Muyumbu Parish in the Kabale District,
Uganda. To do this we will implement appropriate sustainability programs based on the
needs represented in each district in Uganda.

➢ Clean & Safe Water
Clean water is paramount to sustaining life. Therefore, Candles of Hope Uganda is
committed to the collection of water and the distribution of water filtration systems. We are
also committed to training and equipping local partners where safe water is not available.

➢ Healthy Living Environments
Dangerous structures and improper sanitation can derail a child’s life. To combat this, we
help communities create healthy living environments by teaching appropriate sanitation
practices, completing school rehabilitation projects, and showing locals how to build proper
latrines.

2. Agriculture Program
Food security is crucial for communities and families around the world. When we help farmers
increase the food security of their communities and families, we play a part in transforming the
lives of countless people by lifting them out of dependency.

Through our Agriculture program, Candles of Hope Uganda will equip vulnerable farmers and
families with the skills, tools, and seeds they need to produce life-sustaining crops. Tens of
thousands of meals will be harvested each year for our Children’s Feeding program, which will
simultaneously generate income for local farmers.

Our Agricultural program will be piloted in the Kasese and Kabale Districts, where farmers don’t
have access to best-management practices. After being trained in agronomy, farmers in the
program will grow their own crops and help sustain our children’s feeding efforts.

We will also educate schools and churches on how to start and maintain their own gardens.

Our Approach
➢ Assessment
We shall use the best tools available to assess the local culture, context of living
environments, and the economic situation to understand the real food security needs in the
local community.
Education
We shall educate farmers through curriculum, workshops, and the teachings from local agronomists and technicians. We strive to take the best science to the farmers. As we make agronomy education available, we will also increase the information flow to as many in the community as possible.

Implementation
The Agriculture program will strive to assist farmers in implementing the best agronomic practices in both small and large-scale projects.

3. Family Strengthening Program
This program supports families in providing good care for their children and aims to prevent the loss of this care. By strengthening the safety nets for vulnerable children and their families within the community, the potential outcome of loss can be avoided.

Core Principles
The best place for children to grow is within their biological family. Caregivers are responsible for the development of their children, and communities are a direct source of support for the children and their families. The goal for development is the realization of human rights.

Target Group
Children who are at risk of losing parental care are the focus of our program. Children are viewed as being at risk of losing parental care from their family when basic materials, emotional support, and health and educational needs are neglected, or abuse exists because their caregivers lack the capacity or commitment to adequately care for their children. We also include families and communities in the target group as we understand the interdependence of children, families, and communities.

Packages of Services
Through the Family Strengthening program, a range of services will be provided to support the families and communities in their responsibility to protect and care for their children; as well as to encourage and support the government and other duty bearers to meet their obligations to respect, protect, and fulfill the rights of children. At the same time, we will empower children and their families to claim their rights from the government and other duty bearers.

Quality Standards
The Family Strengthening program sets out ten commitments in its response to improve the quality and effectiveness of the assistance provided to the target group which encompasses children most at risk of losing their families, families most at risk of losing their children, and their communities.

1. Children, families, and communities affected receive assistance appropriate and relevant to their needs.
2. Children, families, and communities affected have access to the assistance they need at the right time.
3. Children, families, and communities are not negatively affected and are more prepared, resilient and less at risk as a result of the program.
4. Children, families, and communities know their rights and entitlements, and have access to information and participate in decisions that affect them.
5. Children, families, and communities have access to safe and responsive mechanisms to handle complaints.
6. Children, families, and communities receive coordinated, complementary assistance.
7. Children, families, and communities can expect delivery of improved assistance as Candles of Hope learns from monitoring, evaluation, experience, and reflection.
8. Children, families, and communities receive assistance they require from competent and well-managed staff and volunteers.
9. Children, families, and communities affected can expect Candles of Hope manages resources effectively, efficiently, and ethically.
10. Children, families, and communities are empowered and build partnerships as a result of Candles of Hope’s programs.

4. Family-Based Care
Candles of Hope Uganda makes use of the family-based care model to offer a permanent home, security, medical care, and education to children without parental care.

Empowering Women
When women are given the opportunity to generate income, it impacts their families and their country’s economic standing. We want to empower women around UGANDA to make strategic, independent life choices through community-based training and non-traditional micro-enterprise development.

Our Approach
➢ Micro+
Our Micro+ program will equip women with financial education, vocational training, cooperative saving groups, and even start-up capital. After receiving training and the distribution of capital for small business start-ups, women will participate in income-generating activities as they launch their own small business. Every activity will be monitored by Candles of Hope Uganda staff to ensure support and success. At the onset of the program, all women will engage in self-esteem building activities and are provided with education in basic literacy and numeracy, family health and nutrition, family planning, and the prevention of communicable disease (HIV in particular).

➢ Mothers’ Clubs
Through our Mothers’ Club, women will attend educational sessions where they are trained in nutrition, health and hygiene, literacy, small-scale community agriculture, and craftsmanship/cooking. Participants who display consistent attendance will receive a month’s worth of food to help supplement their diet at home. Not only does this provide incentive for women to come and learn, but it will also help Candles of Hope Uganda address the nutritional deficiencies of children who are not enrolled in school. Caretakers, especially those who are pregnant, will be provided with vitamins for both themselves and their children. All the participants' children under 5 years old are monitored through their Body Mass Index to strive toward a reduction in malnutrition and protect healthy development.

➢ Empowered Girls
