*un mar de oportunidades*

# FAMILIES WITH A NEW HOPE

**La Cristalina, a village in the Siete Vueltas district of San Juan de Urabá, is located 15 kilometers from the municipal capital. According to the baseline established by Apostolado la Aguja in 2021, there were 520 inhabitants living in extreme poverty in 55 homes in precarious conditions; 85% of them were built with non-durable materials, such as wood or palm in poor condition, with dirt floors.**

La **Cristalina** breathes a new air, the community shines with its own light, families have smiles on their faces, their souls feel peace, confidence and hope.

Real changes in their lives that mark their present and weave a future where the word **HAPPINESS** is the great protagonist.

La **Cristalina** will never forget that in 2023 12 of their families started a new life.

Some of the families benefited in 2022

Delivery of housing

# San Juan de Urabá 2023

**12** new homes

In **2023** we have fulfilled the dream of **12 more families** in San Juan de Urabá and the village of La Cristalina who now, thanks to you, have decent living conditions and hope for social development.

# INTEGRAL AND SUSTAINABLE SUPPORT

Our purpose, in addition to generating housing solutions, has been to **provide 360° accompaniment** to the entire community through activities such as:

- Strengthening the sense of belonging and awareness of the potential, limitations and opportunities of the community and its territory and how assertive leadership can **enhance their environment**.
- **Awareness generation** for the attendance and permanence in the educational system and delivery of school kits.

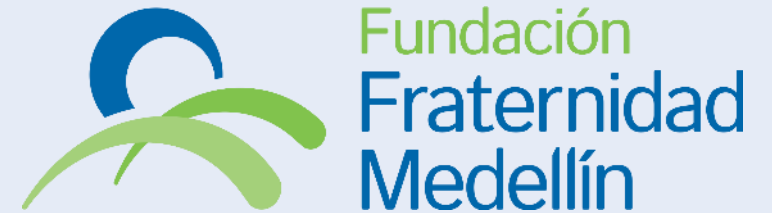

- **Capacity building** through workshops for the improvement of family and community relationships based on respect and dialogue.
- **Conduction of training workshops** on values, resilience and leadership as the articulating axes for community building.
- **Promotion of good treatment** as an articulating axis in healthy coexistence and in the construction of healthy lifestyles.

- 
- A group of smiling women and children are gathered around a woman wearing a wide-brimmed hat, who is holding up a green smartphone to take a photo of several colorful balloons (yellow, orange, pink) attached to a string. The scene is set against a light-colored wall. In the background, a woman with long dark hair and a colorful patterned top is smiling, and a group of children are also smiling. The overall atmosphere is joyful and community-oriented.
- **Training of leaders** to replicate the knowledge acquired and ensure a short, medium and long term impact.
  - **Design and implementation of projects**, resource management and regenerative methodologies to **improve new forms** of community and environmental relations.
  - **Planting of trees native** to the region to promote **environmental care**.

# ¡GRATITUDE!

¡We continue weaving  
*dreams!*
