ENABLE 360 CHILDREN WITH DISABILITIES IN ARMENIA

**Progress Report
January – March 2026**

A NEW YEAR OF HOPE, GROWTH, AND INCLUSION

As 2026 began, your continued support brought renewed hope to children with disabilities in Tavush Marz. Because of you, rehabilitation services did not pause, they continued to change lives every single day.

Each small achievement is a direct result of your generosity!

We are deeply grateful to you for standing with these children and their families!

What Your Support Made Possible

During January–March 2026, our four rehabilitation centers in Dilijan, Ijevan, Berd, and Noyemberyan continued providing comprehensive, individualized services to children with disabilities.

360 children continued receiving essential rehabilitation services, including:

- Physical therapy to improve mobility and independence
- Occupational therapy to strengthen daily living skills
- Speech therapy to enhance communication
- Art therapy to support emotional expression
- Psychological support for children and parents

These are not just services, they are lifelines for families who otherwise have nowhere to turn.

Visible Changes in Children's Lives

Over these months, we observed meaningful progress in children's development:

Improved emotional stability and self-confidence

- Increased attention, engagement, and participation
- More active involvement in group activities and communication
- Greater readiness for school inclusion and social interaction
- Children who once felt isolated are now connecting, expressing themselves, and participating in their communities.

Parents are not just observing change, they are living it.

A Story of Change

Helene Paquet

When Arman first came to our center, he avoided eye contact and rarely spoke. Even simple interaction felt overwhelming. Through regular speech therapy and art sessions, something began to shift.

He started with small steps - responding to his name, holding a brush, sitting longer in sessions. Then one day, he surprised everyone by initiating communication with another child.

Today, Arman participates in group activities, smiles more often, and is beginning to build friendships.

His mother recently shared:

"For the first time, I see my son wanting to be part of the world."

This is the impact of your support.

**YOUR SUPPORT HAS ALREADY CHANGED HUNDREDS OF LIVES.
BUT THE JOURNEY IS NOT OVER.**

Thank you!

Why Your Support Matters Now More Than Ever

Despite the progress, the need remains urgent. Without continued funding, children risk losing:

- Access to therapy
- Progress they have worked so hard to achieve
- Opportunities for inclusion and independence
- Consistency is critical in rehabilitation. Even short interruptions can reverse progress.
