

Removing Dis from Ability of 30 youths!

Report
March -June 2023

This report highlights our progress from March to June 2023 and showcases the impact of your contributions on the lives of 30 youths with disabilities in Berd region of Armenia.

Berd: Honey's Nature Symphony

ACCOMPLISHMENTS: In the past two reporting periods, we have trained 30 youths in Beehive Components, Honey Production, and Money Management. We provided practical support, allowing them to gain hands-on experience in working with bees, maintaining honey quality, and manufacturing secondary beekeeping products. This empowers them with essential skills for economic independence.

IMPACT AND CHALLENGES: Our project has had a profound impact on the lives of these youths, fostering self-confidence and purpose. However, the lack of sufficient funds remains a challenge. We have raised only \$82 out of our \$30,000 goal, hindering our ability to sustain and expand this life-changing initiative.

CALL TO ACTION: We appeal to our current and potential donors on the GlobalGiving platform to consider the immense impact of their contributions. By

donating to this project, you are investing in the lives of these 30 youths, transforming their futures, and creating a more inclusive society.

YOUR DONATION WILL DIRECTLY FUND:

Sustainability of Training: Ongoing support to refine their skills and develop their entrepreneurial ventures in beekeeping.

Access to Equipment and Resources: Providing necessary equipment and materials for honey production.

Outreach and Awareness: Expanding our reach to include more youths with disabilities.

Conclusion: Join us in bridging the gap between ability and disability. Your support can transform the lives of these 30 young individuals in Armenia. Together, we can create a future full of promise, where every individual has the chance to thrive and contribute.

Donate today and be a part of this life-transforming journey!
