

# Empoderamiento de las mujeres y reciclaje en México

Dear GlobalGiving donor: We share with you our 2022 Annual Report.

We work with the firm purpose of training emotionally strong, productive and independent women, thus generating better opportunities for their families through our sustainable production model.

Our productive program **benefits 109 women** creating handmade items from reusable materials. These products not only reflect their talent but also provide them with the opportunity to earn extra income for their families and become self-sufficient.

A total of **32 training sessions** were given where they learned craft techniques such as origami, green jewelry, macramé and weaving. With this they acquired new knowledge and skills.

Thanks to the companies donating waste from labels and packaging, the women produced **27,332 products**, which meant extra financial income for them and their families. Transforming **166.6 tons of industrial waste**.

We continue to face important challenges: such as finding new spaces for the sale of Mitz products that generate income for women. Continue carrying out training in artisanal techniques and in productive projects such as baking and herbalism. Further promote the human development and entrepreneurship program.

At MITZ your donation has the power to transform lives. With your impulse you can support our mission of empowering more women, we work so that a woman sees herself fulfilled since we believe that this will generate an integrated family and a conscious society. Which will contribute to the transformation of sociocultural patterns of behavior in women that naturalize violence.
