

**A letter from one of our partner –  
Milano –  
Centro aggregazione giovanile**

Milan, 12th march 2020

Dear All,

nothing stops us, we don't want to leave our boys! The moment is critical for everyone, but for those who in addition to compulsory isolation, in addition to linguistic effort, in addition to cultural barriers, beyond the effort of socializing "in person", do not even have the tools to stay connected with the world and with the social network it is really too much.

Doing homework, a right for students, becomes an opportunity to get out of social isolation, to see a friendly face through a screen, an adult who is a reference, an educator who is an affection. The electronic log grinds exercises ... but not everyone can access to it, not everyone has the tools, not everyone has the connection and many therefore are alone.

Guys we stay with you, we call you, we study with you, we explain to you what is happening in this world that suffers and that now scares us a little and oppresses us, forcing us to stay at home. We know that for someone it means being alone. You are not alone, we are asking for help and every time we ask for help Mission responds.

We would need new telephones with internet connection to give them to the kids, it is a metropolitan hoax that everyone has a cell phone, not everyone can afford more than a family phone, we would need phone top-ups, internet connection. We need some tablets or laptops, this is a luxury item for some but a fundamental tool since the COVID-19 decided to change our way

of life. We know that the measure of intelligence is given by the ability to change when necessary

**Help us help our kids: they are the future and now,  
they are alone**
