BACKGROUND

Miracle Internet Cafe And computer Training Centre legally registered as a Community Based Organization in Lira is the leading provider of hands-on computer training in Lira Northern Uganda. The Facility was started in 2014 after realizing the need to provide internet services, secretarial solutions, ICT solutions and also the need to improve access to ICT equipment especially in Northern Uganda which was greatly affected by the LRA insurgency for the last generation, consequently, delaying development. And since some schools still lack basic necessities inclusive of computers and internet Services which is becoming the main spearhead to development. The Centre has bridged that gap and there has been improved technology and access to Internet which has transformed lives of many through empowering individuals especially the youth and communities in Lira to create solutions to their own challenges through access to and knowledge of internet technology.

The Centre is located on Corner Kamdini Road, Tesobar Adyel Division in Lira town, currently we offer services which include Internet services, Computer repair, Networking, consultancy, secretarial services, software installation and computer training both hardware and software skills currently we are training 10 youths on computer application. The training is based on the fact that investment made in human beings is seen as the largest investment, brings new understanding and inspiration to the place of life, advocates that every human being deserves a quality education and brings together education and modern technology. The Centre has 10 computers all connected to the internet and 3 dedicated staff with an ICT background who hold diploma and certificates in Information technology respectively
