

Removing Dis from Ability – ABLE YOUTH!

Report
July- September 2024

INTRODUCTION:

During this period of July-September 2024, our beekeeping initiative, as part of the "Removing Dis from Ability" project, has achieved a success. 12 youths from Tavush, including young people with disabilities, actively participated in every stage of the process—from maintaining the hives to harvesting honey. As a result of their hard work and dedication, we gathered an impressive 200 kg of honey in September. This achievement is not only a testament to their capability but also a step towards fostering economic independence and dignified living for these young individuals. However, to continue providing these valuable opportunities and to further enhance the self-sufficiency of disabled youth in Tavush, we urgently need the continued support of donors. Your contributions help us expand our programs, enabling these youths to lead independent, dignified lives while showcasing their abilities. Together, we can create a lasting impact and ensure that more youths have the resources and opportunities they deserve.

Please support our project and make a difference today!
