Impact Report

2019-2020

Our 2020 goals

1

To raise awareness and advocate for the rights of children with disabilities

We work with the community to create awareness on cerebral Palsy and why Early Intervention is Important and the key to a child achieving their fullest potential.

2

To empower children with disabilities, their mothers and families through participation, awareness raising and capacity building

We envision the role of mothers as an added value to the rehabilitation process of their children with disabilities. We train the mother to be the "in-house shadow therapist" for her child, the one who applies the exercises learnt once she returns back home.

Also no two children with Cerebral Palsy are the same so their development depends on severity of brain damage.

3

To provide habilitation and rehabilitation services for children with disabilities

Our main focus is children with Cerebral Palsy. We provide physiotherapy and occupational therapy.

This helps in gaining of motor skills, speech, communication and Sensory integration

Organization Statistics

As a result of what we do, children enrolled in our program aged 0-8 years are able to acquire their life skills. Our services are transformative in nature. We enroll a child who can barely sit, walk or even do anything for themselves because of a brain damage and help him/her achieve their potential through our therapeutic services.

In our program we currently have 57 children who are receiving quality therapy from our therapists to ensure they gain their milestones and participate in daily life activities. Initially they were 60 children in the program but 3 have already gained their milestones and left the program, the other 57 have improved health and some acquired milestones.

Because Management of Cerebral Palsy is Long-term, we expect more children to gain their milestones and leave the program as soon as possible. We aim to continue to empower more children from low income families so they can participate in society.

We hope to add 100+ more children in 2021 to our program based on funds availability

Organization Statistics

We aim to Empower Mothers of Children with Disabilities as ambassadors for change and a guarantee for success.

To empower means to give power to someone or a group of persons to make them stronger and more confident, especially in controlling their life and claiming their rights.

In our case, the intended meaning is to empower parents especially mothers of children with disabilities to play their roles in the family and society. Mothers are the heart of the family, hence empowering them means empowering all members of the family.

In the year 2019-2020 we have trained 60 mothers by giving them knowledge and skills necessary for unlocking the potential of their children.

We intend to train 200+ more parents in the year 2021 depending on funds availability.
