

**HELP EVERY CHILD
BORN WITH CLEFT
RECEIVE THE CARE
THEY NEED**

**Adam in 2023
and as a baby
in 2017.**

A world where no one suffers needlessly from cleft is possible.

Living with untreated cleft creates tremendous burdens, especially for people who already lack resources. Our hope is that:

- No infant is abandoned because their parents don't know how to care for them.
- No child is bullied and stigmatized because they look different.
- No adult lives in poverty because they can't find a employment.

Our founding volunteers have been providing much-needed humanitarian cleft care for more than 36 years and know that our vision is within reach.

You can make a difference!

Even after the first surgery, a child born with cleft lip and/or palate already has a new chance for a healthy and full life.

The average cost of a cleft lip/palate repair is \$1,500—truly a small amount given the life-changing impact of cleft care.

Your gift of \$1,500 will start a child's health smile journey!

Healthy Smiles, Healthy Lives

Our teams of medical volunteers provide integrated and individualized care to GSF MENA patients on annual outreach programs to underserved areas of developing countries.

Your \$1,500 gift empowers life-changing care for our patients. **Every dollar donated** makes it possible for our volunteer teams to give their time and expertise—approximately \$1.5-\$2 million dollars in donated medical services on every mission!
