

## **WE SUPPORT MORE CHILDREN, WE STRENGTHEN MORE FAMILIES**

Over these past months, we implemented family strengthening projects in new communities such as Trancas and Concepción. We had the opportunity to provide families not only with symbolic resources, but also with real resources.

materials that represent great value to each of them.

During this period, we highlight the importance of group spaces and gatherings. The collective construction of knowledge, the formation of networks, and the spaces for listening and support alongside others traveling similar paths are invaluable for the community. In these spaces, based on a pedagogical approach, feelings, perceptions, and assessments of the responsible adults emerge within the framework of early childhood support.

*Thank you for helping us support children by reaching more and more families.*
