# **MIT Brings Computer Lab to BeeHive**

In 2008, the world is safely into the digital age, and it's never turning back. Malawi hasn't been forgotten, either. Computers are beginning to appear on the desktops of small businesses

and in the laps of the less affluent. In the coming years, computer and mobile technology will rapidly trickle down to become ubiquitous in the Malawian workplace. Reaping the benefit of this new technology will require

competent and innovative minds and where better to build them than at the Beehive School?

Beehive headmaster Niall Dorey believes that IT education at the primary level will prepare his students for success in a struggling job market by equipping them with rare and valuable skills. By becoming familiar with basic computer skills at a young age, Beehive students will

enter secondary school with a competency in technology that their peers lack. This advantage will eventually serve students very well as they look for work in a job market that will increasingly demand computer literacy.

### MIT Students Justin Cannon and Petek Saracoglu are BeeHive School's Heroes!

Fueled by Dorey's conviction and the proactivity of other Beehive volunteers, Justin Cannon and Petek Saracoglu arrived in June with twelve computers and a mission to modernize Beehive's

computer lab. Having raised money and collected donations from MIT, Justin and Petek immediately got to work refurbishing the lab with new desks, a fresh

coat of paint, and a dozen top-of the-line computers. Finding the right supplies to connect the machines was sometimes difficult, but the new lab was working and ready for students within a few weeks.

Justin Cannon and Petek Saracoglu created posters to explain the inner workings of a computer

PAGE 2

# **BeeHive Computer Lab**

In addition to shipping and installing the computers, Justin and Petek strove to introduce the lab as an educational tool for teachers, as well as students. Beehive teachers were invited to four all-day bootcamps during which they learned basic computer skills, how to operate the lab, and teaching strategies. Shortly after, Beehive students entered the lab with bright eyes and high expectations.

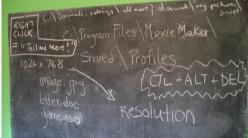

Since Justin and Petek returned to the U.S. in August, the Beehive staff has taken proud ownership of their new lab. Students continue to use the lab twice a week and have access to more educational games and tools than ever before. Beehive hopes to develop an IT curriculum around the lab that will focus on training technology skills beyond basic computer usage.

BeeHive Computer Lab Grows from Two Computers to a dozen with the help of Justin Cannon and Petek Saracoglu

# **BeeHive IT Curriculum**

In BeeHive's computer lab, students are taught everything from basic mouse movements and search skills to the inner workings of the hardware in a computer to more advanced concepts. BeeHive is very grateful for everyone who made their computer lab possible.

BeeHive Students Dig Deep and Learn about the Inner Workings of Computers

BeeHive School Teachers and PTA are Trained in the New BeeHive IT curriculum

# MIT Knowledge Box (K-Box)

This past spring, four MIT students: Justin Cannon, Christina Soyeon Kang, Angela Mjojo, Leanne Veldhuis, and Jen-Hao Yang, partnered with BeeHive School to create a platform that would bring a snapshot of the internet to remote areas, like BeeHive school where the internet will not arrive anytime

MIT Google @People @Ot Go BeeHive enjoyed fifteen minutes of fame this past year as it was featured on the MIT homepage. It was a big day as the website reached the first search item on google for the term Beehive and got over 30,000 hits. The media coverage was vital as it attracted several key donors that ultimately made the MIT-BeeHive Computer Lab Project a reality. Many thanks to the MIT web crew for their timely and generous support.

HOGWARTS COMES TO BEEHIVE

In the tradition of Harry Potter and schools in England. BeeHive has created four "houses" or teams that compete for the House Cup—a giant trophy! Bee-

Hive's Tigers, Lions, Cheetahs, and Leopards strive to outperform their peers in this good-natured competition through sporting events, mental math matches, spelling competitions, acts of kindness, good manners, and class participation.

# **BeeHive News**

#### TIGERS DOMINATE SPORTS DAY EVENTS

Despite the drizzle, sports day on July 18th was a huge success with events in soccer, netball, jump rope, and races. Tigers won most events and made a total of 90 house points!

Sincere thanks to Mr and Mrs Chikhuta and Mzuzu Hotel for the generous loan of PE equipment.

#### NATIONAL TREE PLANTING DAY

Standard 4 is planning a spelling bee to raise funds for a tree nursery which will be distributed under the National Tree Planting Day on the 2nd Monday in December.

With heavy logging in the area, students are happy to plant some new trees to beautify their city.

Parent Mr Nkwazi has volunteered his green thumb to help out.

### **Rowan Haysom Develops Architectural Plans**

Rowan Haysom (www.haysom wardmiller.co.uk), an architect in the UK, has kindly offered to design the school free of charge. He has many far-sighted ideas that will not only minimize construction costs, but create jobs for local laborers and at the same time make the school 'green' and sustainable.

houses, the new plans call for more

This teacher's special is dedicated to the standard 5/6 teacher Bahat Phiri who recently retired from BeeHive. Mrs. Phiri has an extensive background in teaching high school students and nurses biology. Her Mary Poppins no-nonsense attitude combined with her motherly instinct made her an excellent

teacher who was respected and Muslim and is a strong symbol admired by all her students.

Originally Mrs. Phiri joined Beehive school on a temporary basis, helping out with a small class of six children in preparation for them going to secondary school. She is a neighbor of the school and three of her grandchildren study at BeeHive.

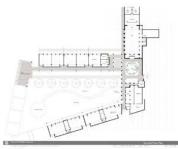

Mrs Phiri is also a practicing

Rowan is from South Africa and is familiar with common building practices, local material availability, and environmentally friendly construction methods. Using simple, yet effective passive solar techniques he is designing a school that will remain temperate despite the harsh heat and cold that is not uncommon in Mzuzu, which is located in the mountains and witnesses harsh seasonal weather shifts. The point is that BeeHive needs a safer, bigger, and more student friendly school.

Rowan's models and detailed cost estimates are available at:

http://www.beehiveschool.com/ construction/plans.php

http://www.beehiveschool.com/ construction/cost.php

Aerial Cross Section of the New **BeeHive School Architectural Plans** 

of the diversity and inherent tolerance present in every aspect of BeeHive School.

Now that she is retired, Bahat will enjoy her free time by socializing with friends, cooking, reading, and looking after her grandchildren.

BeeHive Volunteers, like Charles Lee below, go the extra

Scotts Valley Rotary Club Donates books to Improve the Teacher Training Program

### **People Coming Together**

A bake sale might sound like a small thing - but to Bee-Hive it is not. It takes a different kind of person to realize that a small school on the other side of the world is connected to us in a very real way. That one bake sale is a critical part of the larger solution - the bigger picture.

The truth is that it is through the combined efforts of bake sales, charity runs, card sales, individual donations, and small events, that BeeHive will eventually realize its dreams. Through the efforts of many minds sharing an idea and little by little sharing that idea with more people - the idea that we are all connected and that we must all reach out to one another.

There are dozens of people from all backgrounds starting to reach out and help this school doing little things to make a big difference for the BeeHive School community.

### The Human Race

At 7am on Saturday, May 10th, seven volunteers united to represent Bee-Hive School in the annual Human Race in Mountain View, California. It was a beautiful, sunny day and there were hundreds of runners representing a plethora of non-profits. There was something for everyone—a 5K walk for those interested in a morning stroll with their favorite canine and 5/10K runs for people looking to get some sweat on their brow.

Thank you to Alicia Clum, Charles Lee, Brian Hachtmann and Danielle Sheehan

#### for running a great race! Congratulations in particular to Charles Lee and his coworkers from Volkswagon for their generosity—they get the bragging rights for raising the most funds!

The booth to educate people about Malawi and tell them about BeeHive School was a great success with paper copters and African maps for coloring. Special thanks to Angela Otero, Alicia Winquist and Katy Harrison for running the booth!

Brian Hachtman ran a great 10K!

These books are the first step towards creating a comprehensive reference library for BeeHive teachers and other local schools.

### Scotts Valley Rotary Club

This summer, BeeHive received a generous donation of valuable teacher training resources from Scotts Valley Rotary Club. These fifteen books cover a range of subjects from teaching literacy and numeracy to effective classroom management to child development. The cornerstone to Bee-Hive's success has been its intensive and ongoing teacher training program. It allows for an international level of education within a Malawian context by taking local teachers and providing them with the necessary tools and skill sets to teach to their full potential.

### **Golden Gate University International Law Students Association**

In the heated competition, mounting stress, and sleepless nights that accompany finals, the Golden Gate's International Law Student Association stayed up into the wee hours of the morning sacrificing precious study hours to make delicious sweets for the BeeHive Bakesale.

Why during finals? Good question! Being the brilliant critical thinkers and marketing minds that they are—these students realized that it is during finals that their fellow classmates would most want savory desserts and sugar to combat the draining long hours in the library. It is that time of year when students look only for one thing when in search of food—proximity. And so they stationed themselves outside of the library in shifts to raise \$145 for us by selling brownies and other treats. A special thank you to Jim Betinol

realized that it is during finals that and the other students for their their fellow classmates would support! I guess lawyers aren't most want savory desserts and so bad after all!

### **Stanford African Students Association**

The Stanford African Students Assoc is composed of students that grew up all over Africa from Ehtiopia to Ghana to Botswana to South Africa. These students understand the impact that BeeHive School is making in Mzuzu and are enthusiastic to help the school further.

These talented individuals understand what is takes to suc-

# Menlo Park Block Parties

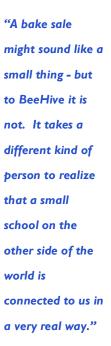

BeeHive School had a unique presence at the summer Menlo Park, California block parties. Block parties include a rich variety of music, food, children's activities, information booths for local organizations and corporations.

The BeeHive booth raised awareness about education in Africa. The BeeHive video, photos of the school, and architectural plans for the new building sparked interest in a number of people. We were really impressed that it was the kids who spent the most time looking over the photos and video and learning about Malawi and BeeHive.

ceed and not only have great ideas for BeeHive School, but serve as role models for all future BeeHive students hoping to pursue higher education.

During our first meeting, the group kindly donated funds towards the BeeHive School Project!

Above: A child is entranced by BeeHive School's video.

Left: Spencer Ahrens mans the BeeHive School booth.

### **Great North Run**

Niall's old friend, Rene Dunlop, who first travelled with him to Malawi, also helped fundraise for BeeHive School.

Rene raised funds by running in the "Great North Run" in Newcastle upon Tyne, England.

It's amazing to see so many The Great people from all North Run in over the world Newcastle coming together upon Tyne, out of compas-England sion. They truly

understand the value that BeeHive provides to the community of Mzuzu and BeeHive's faculty and students.

### Maureen and Stephan Dorey Host Smashing Dance Party!

Maureen and Stephan Dorey, Niall's parents, are great supporters of BeeHive and organized a Scottish Country Dance. The dance featured live music, a raffle, home -baked goodies, and flying feet. It was a night to remember!

I

# **Brook Knoll School**

Katy Harrison's mother, Wendy Harrison, is a special education teacher at Brook Knoll Elementary School in Scotts Valley, California. Ever since starting the BeeHive

School website and USAbased fundraising effort. Wendy and her class have been

great supporters. Their enthuis intoxicating and has led many others to chip into their yearly book drives for Bee-Hive.

The class at Brook Knoll School has sent some of their favorite children stories to share with the BeeHive students. This is just another example of how connected BeeHive is with so many communities around the world. Niall and his students are always excited to receive books and truly treasure them.

On behalf of Niall, BeeHive's teachers and stusiasm and support for BeeHive dents, and the BeeHive PTA and community members, we thank Brook Knoll School for their generosity and kindness.

# Financials-Our Goal: \$76,876.00

#### Where we are: \$4,341.68

#### What's left: \$72,534.32

BeeHive School is incredible -Niall Dorey, the headmaster and driving force behind the school, started BeeHive with eight students in the living room of his house in 2003. Five years later. the school has over 150 students and is a thriving center for learning, creativity, and personal growth. The teachers and students are committed to the goals of the school and are constantly striving to perform to their full

potential.

Former volunteers started a BeeHive School presence in the US over a year and a half ago after having visited the school in summer '06. They were deeply impressed by the school and its success despite the obvious resource challenges that the school deals with on a day to day basis. Ultimately, what it comes down to is that the US BeeHive School Project is not re-inventing the wheel with BeeHive School. A lot of school-based efforts fail because organizations or groups

build a schoolhouse without the necessary social infrastructure being there to really make the school valuable. BeeHive School already exists - it has all the necessary motivations, teachers, students, PTA, and curriculum, but lacks the necessary funds to expand and improve. We are giving the school the resources to reach its full potential. Please visit below for a detailed cost breakdown:

http://www.beehiveschool.com/ construction/cost.php

**BeeHive School** has all the necessary social infrastructure motivations, teachers, students. PTA. and curriculum but lacks the necessary

# What Your Dollars Can Buy...

- (1) Why not donate \$20 to BeeHive School? \$20 will buy seven iron sheets for the new roof (27 are needed)
- (2) Why not donate \$50, which (5) \$12,000 will buy one will buy one metal door or window.
- (3) You could even donate \$250 to BeeHive school! \$250 will buy 52 pinboards, which will be used to display students' work.
- (4) Or are you are feeling really generous?! \$5,600 will build a bathroom block (2 needed).
  - brand new classroom. and we'll dedicate the classroom to you and put up a placard in your name or company name.

Donated books are much enjoyed

funds to expand and improve.

### Good and Bad News From BeeHive - School Shut Down Temporarily

We'll give you the bad news first. BeeHive was inspected by a team from the Ministry of Education in the beginning of November of 2009—just a few weeks ago. The classrooms, which are temporary buildings, have been deemed to be "not up to code" and BeeHive has been shut down, at least temporarily. BeeHive School is not alone as there are over one hundred schools in Malawi that have been closed so far. Niall and the BeeHive students are not despairing because the parents are all strong supporters of the school and are doing everything possible to get it back up and running. However, now more than ever, it has been made glaringly obvious that BeeHive needs new classrooms.

Now for the good news, the same day that BeeHive was shut down, the school received a letter that they have been waiting for for three long years. This letter finally approves BeeHive's plans to build a new school on their new plot of land where they can expand and build a permanent school

that is safe, child-friendly and will last generations to come.

Good News—BeeHive's School New Building Plans Finally Approved After Three Long Years!

#### **The Beehive School Project**

1020 Florence Lane, Apt 8 Menlo Park, CA 94025 United States

Phone 1: 510-520-8966 (Katy Cell) Phone 2: 510-508-6804 (Eva Cell) E-mail: info@beehiveschool.com

**Give Education, Give Hope** 

The Beehive School project is designed to help Beehive School. The school is an elementary school in Mzuzu, Malawi founded in 2003 with 8 students and now has over 150. The school is transforming the education system in Mzuzu, emerging as a model school with a strong academic core that uses an international pupil-centered curriculum within a Malawian context. BeeHive School is preparing leaders and innovators for tomorrow.

The Beehive School Project has five main goals to help Beehive School. These goals are to:

- (1) Raise funds towards the new buildings,
- (2) Outfit the school with a computer lab and internet,
- (3) Raise funds for community outreach,
- (4) Use sustainable practices in the new school,
- (5) Attract qualified volunteers that can build and teach at the school.

# About Us

After graduating UC Berkeley in May 2006, Eva Markiewicz, Katy Harrison, and four other recent graduates spent a summer in Malawi. As well as site seeing, spending a few days at Lake Malawi and going on a safari, they taught science to children at local schools.

Beehive school stood out as a 'diamond in the rough' so to speak and with a little help, they feel this school will give children a great education and also help the area. When they came back to the US, they brainstormed ways to help the school. With the support of their friends, family, and even the aid of some kind strangers, they got a website up and running! Now the website is looking good, the second newsletter is out and the fundraising adventure is underway.

Please contact us if you would like to volunteer locally/ internationally or get involved with BeeHive in some other way.

# **ASAP Africa Relationship**

BeeHive School Project, which operates primarily in Menlo Park, California is legally a partner with ASAP Africa. ASAP Africa is a 501 (C) 3 non-profit that has proiects in Zimbabwe and Malawi. They were founded in 1992 by a couple who met and married in the Peace Corps while in Swaziland working in rural African schools. The organization's goal is to, "create an organization whereby development projects and activities are not 'inflicted' upon local people, but truly spearheaded by capable members within those communities." ASAP Africa provides financial oversight for the BeeHive School Project and covers a

low, 5% fee for this assistance. Besides providing financial oversight, ASAP Africa is an experienced partner who can help us navigate the challenges ahead. To learn more about their laudable work, go to: www.asapafrica.org

BeeHive School Project is currently embarking on procuring its own non-profit status with the aid of volunteer Jim Betinol who recently passed his board exams—congratulations Jim!

#### The BeeHive School Project is currently initiating procurement of 501 (c) 3 nonprofit status
