

THANKS TO ALL THOSE
WHO MAKE THIS DREAM
OF WORKING WITH AND
FOR THE CHILDREN OF
THE COMMUNITY OF THE
CSU POSSIBLE

The educational project of the CSU is embedded in the School of the Art of Loving

Synergies have been created with other organizations. Using the 6X1 methodology and involving the CSU community, we were able to learn about the neighborhood's priorities, environmental noise was identified as one of the biggest problems affecting them, and workshops have been held to improve this situation.

All the activities of the School of the Art of Loving contribute to the personal growth of the children, instilling values that allow them to recognize themselves and others, to be more resilient and to be protagonists of their own history.
