SEPTEMBER EDITION

## NEWSLETTER

Pictured above: One of our facilitators, Mila Gciza, posing with grade 3 class in front of their newly planted tree.

### APT Course

Our three week applied permaculture course was a success! It ran from September 9th to September 26th. We had 11 participants complete the course during which they learned how to sustainably plant crops, design their own permaculture garden, and apply the permaculture principles to their own lives.

### PLANTING THE FUTURE

We have exciting news! This month SEED donated 65 trees to the Rocklands primary school. Each class was able to plant two trees on September 12th and 13th. The kids had a blast getting to plant and water their own trees with the help of our team and APT course participants. The previously bare school yard will now feature trees that will grow and provide shade for the kids, especially on hot days. We believe it is essential for our youth to learn and understand about the importance of taking care of nature and the use of sustainable permaculture practices.

### Caradale Primary

We recently expanded our outdoor program to include Caradale Primary School! The kids in Grades 4 and 6 will be participating in practical lessons linked to their natural science curriculum.

### Upcoming events:

- Spring market Nov.09
- resilience course Nov.11
