December 1st, 2020

“It’s not how much
we give but how
much love we put
into giving”

#GIVINGTUESDAY

Summary

Having to climb a tree for making a call or have enough internet signal to send a message, walk more than two hours to a hill or ride kilometers in a motorcycle to reach the nearest village and get three lines of phone signal that allows internet connection is what most rural youths and children must do during COVID-19 to access education, information and opportunities. We aim at providing rural youths a connectivity KIT with energy and internet access, as well as basic IT equipment.

Close The Gap: Rural Communities Connected Zero (0) Poverty

Challenge

Rural areas in Colombia have low internet access impeaching many from pursuing personal dreams such as online study and carrying out entrepreneurial activities. Lack of connectivity, energy and technology access in rural areas are affecting our work as a foundation by loosing contact with them. This lacking has also resulted into lack of food, transport and an increase on rural violence. No connectivity is a threat for food security, no poverty, public health, security and peace. #CloseTheGap

Solution

With a team of rural youths we built a plan to achieve connectivity in their communities overcoming the challenges COVID-19 brought and any other barrier. Through a Rural Connectivity KIT with essential elements such as a laptop, an off grid solar Kit and an internet amplifier signal/ internet solution rural youths will be able to enhance their capacities as agents of change in their communities. This Rural Connectivity Kit is a bridge to empower and connect rural communities. #CloseTheGap

Long-Term Impact

By providing connectivity access to these 10 rural communities in the departments of Cordoba, Bolivar, Sucre, Atlantico, Cesar, Caqueta, Meta, Antioquia, Choco, Casanare up to 250 vulnerable families will be benefited impacting the lives of boys and girls that have lost access to education, rural youth entrepreneurs and their families. This Rural Connectivity Kit bridges the gap for one rural youth and his/her community to change.
