

The background is a deep red color. Two large, dark red hands are cupped together, framing the center. Inside the hands, at the bottom, is a small silhouette of a girl with pigtails, wearing a dress, standing with her arms slightly out. Above the girl, many small birds are flying in various directions. One bird, located slightly to the right of the center, is a bright yellow color, standing out from the dark red birds.

Future Rising Fellows 2022 Cohort

Girl Rising currently reviewing 800+ applications from 61 countries for the 2022 cohort who will focus on water and food security, and local solutions. The Fellowship Program will include:

- Handover Symposium with inaugural cohort and new 2022 Fellows
- Storytelling Bootcamp in early summer
- Fellowship stipends, additional financial resources, key opportunities to share their voice and vision on influential platforms including UNGA and COP27, mentoring and coaching

The Future Rising Visionaries Fund

Girl Rising is establishing a new multi-year **Future Rising Visionaries Fund** to support nascent organizations founded by our Future Rising Fellows and Alumni. The Fund invests in organizations that are poised for impact and growth in their communities. Along with annual discretionary funding, Girl Rising will support these young social entrepreneurs with mentoring, capacity building, networking, and measurement and evaluation training. **The Future Rising Visionaries Fund invests in the power and vision of young leaders to drive social change.**

Future Rising Visionaries Fund Spotlight

Future Rising Fellow Julieta Martinez is the founder of Tremendas a collaborative platform that connects youth engaged in grassroots climate activism. The project provides hands on climate education through the first 'Climate Academy' which graduated 600 youth last fall. Altogether, Tremendas works with approximately 2000 adolescent girls across the Latin America.

Future Rising Fellow Leticia Tituana founded WARMI Stem, an organization that seeks to support indigenous youth in the pursuit of STEM careers and that combines Indigenous ancestral knowledge of nature based solutions with Western science to meet local needs of indigenous communities that are facing environmental challenges around clean water and food security.

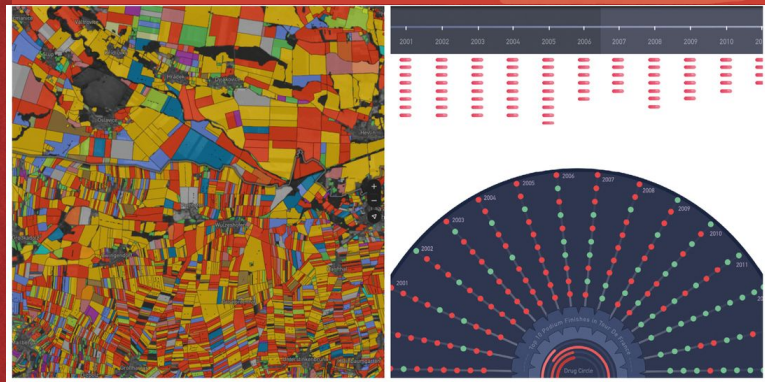

Digital Story Hive: A Different Kind of Climate Model

Interactive digital platform that connects narratives and data to illuminate hidden connections between girls education and climate change

Fosters deeper more nuanced understanding of critical issues by using storytelling to humanize and contextualize data

- Fellows content
- Signature Future Rising content
- Crowdsourced and aggregated content
- Creative, media, educational and distribution partnerships
