

Dear Donors and Friends,

We are thrilled to reconnect with you and share the wonderful progress happening in our classrooms! Building on the fantastic momentum from our last update, our students in Los Roques and Canaima continue to shine, and our team is working harder than ever to enrich their learning experience.

First, we are excited to share that the structured enrollment process and our practical, communication-focused syllabus have been such a resounding success that they will remain the foundation of our program for this entire school year. The students are truly thriving with this clear structure, and their confidence in speaking continues to grow every week.

But we haven't stopped there. Our Teachers Commission has been innovating to take learning beyond the classroom! To reinforce what the students learn during lessons, we have launched a digital support initiative. Our teachers are now carefully curating educational videos tailored to different age groups—ensuring our youngest learners get highly interactive and engaging content. When we can't find the perfect video online, our amazing volunteers roll up their sleeves and create custom video lessons themselves!

These resources, along with a newly designed Review Guide created for every single unit, are shared directly with the parents' WhatsApp groups. This incredible teamwork between volunteers and families allows the learning to seamlessly continue at home.

Behind the scenes, we are also strengthening our teaching team to ensure the highest quality of education. Once a month, our Education Commission hosts a comprehensive training session for all volunteers preparing to travel to the communities. This vital space aligns everyone on planning, methodology, and class preparation. For our students, this means a consistent, organized, and structured educational experience, no matter which wonderful volunteer is standing at the front of the classroom.

Every printed review guide, every recorded video, and every volunteer training session is fueled by your unwavering support. You are helping us build a sustainable, high-quality educational model that is truly changing lives.

Thank you for continuing to believe in this mission and for being a vital part of our journey!

Warm regards,

Our dedicated volunteers and students in action
