Structure

VISION:

Africa Institute of Medical Services and Technology (AIMST), is a 501(C)3 nonprofit/not for profit institution registered in Georgia, USA that plans to transform rural communities, especially, in Ghana into a hub of industry and technology to promote social and economic self-reliance in an environmentally conscious green community that will seek to fuse the good between indigene and diaspora Africans who explore to make Africa home. It also aims to create a culturally welcoming environment for all friends of Africa seeking work and happiness in Ghana.

MISSION

AIMST has the goal of contributing to improving the health services, health education, and medical infrastructure in rural areas of Ghana in the short term, and in other African countries in the long run. The ultimate outcome of this goal will be a tertiary institution that would help rebuild and empower local communities to find lasting solutions to fight poverty, hunger, and diseases, as well as reduce the migration from rural to urban areas.

Objectives

Goals and Objectives

1. To promote health best practices and fight diseases through Capacity Building by:

a. constructing/establishing postsecondary and tertiary institutions that will train medical assistants, laboratory technicians, nurses, midwives, and dental & optometry technicians to work in hospitals as well as do field work.

b. Building a university/medical school and/or a teaching and research hospital.

c. Providing services to reduce infant mortality and improve maternal health, and find solutions to HIV/AIDS and malaria.

2. To build schools and recreational facilities for the students, health workers and their families.

3. To be involved in the overall economic empowerment and improvement of quality of life for residents in about a 50mile radius from the project sites.

4. To extend the project to other rural areas in Ghana and Sub-Saharan Africa.

5. To provide job and residential opportunities to the community and medical personnel in order to reduce brain drain.
