contratos en ley

In the absence of public information in clear, integrated, accessible and complete formats; **Sembrando Sentido**, has created ''Contratos en Ley'' ("Contracts by the Book"), a public platform that opens, monitors and evaluates public contracting through the following components:

1 Search Engine

Centralizes, integrates and facilitates the search and analysis of public contracting data.

2 Evaluator

Assesses public procurement processes, including its legal framework, current policies, and results, to identify key weaknesses and propose solutions.

3 Monitor

Under Construction

Identifies public procurement corruption risks in real-time, allowing public officials to respond and address risks before these materialize.
