

Culinary School

GENTE AYUDANDO GENTE

EL SALVADOR

The culinary school idea comes from identifying the need of families for a steady income when only being able to participate in saturated markets of informal selling of products or food.

At least 5 of every 10 families in our communities have a family member that sells informally.

We want to give these families a competitive edge by giving them the tools and knowledge in order to incorporate in the formal sector, specifically Restaurants, Hotels, Resorts, Bars or even undertake their own business.

Students in our culinary school will be able to learn techniques and food from different parts of the worlds.

The formation process will take a period of three months and they will get a certificate that will support their training.

This opportunity will change the lives of so many Salvadoran families that are struggling to subsist with minimum monthly, weekly and daily earnings.

We are looking to help families that want a fresh start, people that want to provide for their families, cancer survivors, people that work for sick family members, people that are eager to have a better future for their loved ones

The scholarship will last three months,
twice a week for a total of 6hrs

The monthly cost for each student is
of \$75.00, the entire scholarship is
\$225.00

Our class capacity is of 18 students per graduation.

We will be supporting 72 families a year. This equals to impacting approximately 216 people

How many lives would you be willing to change?
