## ANNUAL ACTIVITY REPORT 2021-22

### After school education

After school education will help students realize their potential, supplement knowledge and to compensate skill gaps. CHHASE makes sure 1200+ under privileged & tribal children remain active, motivated, and happy during their time away from school. Educating the under privileged ultimately will make a change for whole family and future generations.

We promote academic success, pay school fees, school kit (School bag, note books, pen, pencil, geometry box, scale, color pencils etc) to under privileged and to tribal children. This project will ensure the children education without drop-out. During 2021-22, 220 tribal children were provided with new dresses to wear. also we are ready to provide 550 children with school bags and writing kits.

Tribal children never go to school regularly. Their main requirement is food three times a day. If food is provided, they can be able to attend school. Keeping their requirement in view, our society started tribal education school, which is an after school programme. This programme provides dinner. Education instructors give them free tuition. To keep them hygienic, we provide New dresses, oil, soap etc. This programme also gives awareness to parents about child labor, skills training, income generating programs and health camps.

## **TRAININGS TO WOMEN**

Trainings are more useful when women start their own business. They not only lift themselves out of poverty, but they have a much higher percentage of putting revenues directly towards their family needs and they are much more likely to educate their children, especially their daughters.

Various types of trainings, such as Tailoring, Embroidery, Beautician, articial jewelry, computer based were provided to 100 women in tiruvallur&kancheepuram districts. In 2021, 100 women in sewing provided training. We have provided placement to 75 people in nearby industries and offices. So far our nonprofit provided 15000+ youth, women and widows till date

## **DAY CARE CENTRE FOR ELDERLY**

The less privileged elders need our love and care. This project provide meal, medical care and recreation to 59 homeless old age persons. Every day we provide nutritious food to destitute elder, who are neglected by their families. Due to poverty some families not able to feed these older persons. Among 59 poor old age persons, some of them use to beg at neighbor houses, nearby locations to feed themselves. Our little contribution to the elderly make their world healthy and happy.

## **FOOD GROCERIES TO LONELY ELDERLS**

CHHASE NGO identified 57 neglected elderly people, 12 poor disabled, and 9 neglected lepers cured in Tiruvallur and Tiruvannamalai Districts of Tamil Nadu and providing monthly groceries consisting of Ponni rice, Tuar dal, groundnut oil, soaps, hair oil, vegetables & other necessary items. Groceries are delivered monthly at their door step by us/our volunteers. The neglected/destitute are happy for this kind of help & able to eat food timely and healthy.

## **DISASTER MANAGEMENT**

**“Crisis is the better opportunity to help others.”**

We are in forefront, whenever disaster occurs. We have provided relief to the victims of Fani, Gajacyclon, Vardha cyclone and Chennai floods, Covid-19 relief and rehabilitation Etc.

In the month of June, 2021 we have provided ration kits, blankets, towels and saris to 62 blind families in maraimalainagar.

During Nov, 2021, Tamil Nadu met with continuous heavy rains. Due to this heavy rains, many villages became as small islands and daily wage workers lost their source of income. We have provided ration kits and blankets to 150 victims families at poovanur village.

## TREE PLANTING & AWARENESS

Environmental awareness camp was conducted in Govt. higher secondary school. The theme was CLIMATE CHANGE. Our speakers created awareness about **global warming** due to carbon deposit. The participants were advised to plant trees. Vermi- compost preparation was shown in demonstration. The participants were advised to set up WATER HARVESTING UNITS to recharge the underground water.

Our society has distributed 500 plants to school children to plant at their homes and care. This action will give them interest to school children to plant more trees and take care to restore global warming.

Our NGO has planted 161000 plants till today.
