## **Shuttle and Transportation Services**

### **Project Summary**

Each One Teach One is a youth led organization that provides support to over two hundred children from the disadvantaged community of Kliptown and other neighboring communities outside of Johannesburg, South Africa. By generating profit from our transportation and shuttle services project, we'll provide funds needed to continue our operation and hopefully expand the scope and range of our services.

### **What is the problem?**

Necessary resources in Kliptown are in limited supply. Running water is scarce. Proper sanitation, safe electrical installations and proper schooling is limited. Due to the Covid-19 lockdown many parents have lost their jobs and can't provide food and other necessities for their families. Also, because of Covid-19, South Africa had to cut down on international travel which has severely curtailed a previous source of income for our youth center. While the need for our services has grown exponentially, the forced lockdown has had a negative impact on our operation.

### **How will this project help solve the Problem?**

Having a minibus will create a safe way for our youth to travel roundtrip each day from school to their homes. The minibus will also be used as a shuttle bus to help us bring in revenue from our growing tourism business. We will be creating travel arrangements with hotels, tourism companies, other businesses and schools that need transport services. Profits from this business will be used to keep our youth center sustainable and help it grow.
