

## Harambee Youth Mentorship and Health Advocacy

### HAYMHA PROFILE

#### WHO WE ARE:

Harambee Youth Mentorship and Healthy Advocacy (MHA) is a global smart youth network for young people's self-actualization, progressive transformation and social development. We strive to create a new generation of active and focused young people who are individually responsible, socially active with an upright global stewardship thought, skills and character for better development outcomes as our mission.

#### WHY WE EXIST.

We exist to address problems being caused by global youth population explosion such as extreme violence/crime, Unemployment/poverty, disease, moral decadence and climate change. We do this by enabling young people to mitigate, adopt to and recover from economic, environmental and social shocks and stresses.

#### WHAT WE DO.

Our work is focused on the following four core thematic areas namely:

1. Mindset reformation.
2. Economic empowerment.
3. Health advocacy.
4. Green economy advocacy.

### HOW WE DO IT.

We work through an approach of development of youth by the youth delivered through the development of a young person's abilities, competence and skill to practice diligence, self-help and cooperative spirit for global smart stewardship. This is done by way of;

1. Establishment and development of Harambee Go clubs in institutions of learning, workplaces and local communities where young people adapt to self-actualization, progressive transformation and social development.
2. Establishment of Harambee innovation hives and demonstration farm fields as business skilling and mentorship centers of excellence in idea generation, business incubation and acceleration towards employment creation.
3. Conduct community awakening outreaches and sensitizations on health and green economy revolution and advocacy.

### WHERE WE WORK.

HAYHMA is currently operational in Africa with plans to establish its presence in Asia, USA, UK and Europe.

"Raising awareness of human rights, freedom of religion, resolving conflict and development of counter-messages, positive narratives in response to violent extremist propaganda"
