REPORT PROJECT: PROVIDE HEATHY WATER AND FOOD FOR 5953 CHILDREN

The project "Provide heathy water and food for 5953 children" aims to carry out drilling and produce vegetable through agroecological practices in 11 primary schools in rural area. Il is an opportunity to allow 5953 pupils to have drinking water and healthy lunches.

The project have been implemented in four schools : The schools in the villages of Yombo, Sékia-Dalet, Nzilla and M'Poko Bac.

In october 2024, AFDD drilled a water well in the school of Yamboro village and provided them vegetable seeds and farming tools.

The pupils of Yamboro village were trained in agroecology, biopesticide process.

They were trained in nutrition by « Nutriecole app ».

The pupils helped by theirs parents and teacher, produced for one year (november 2024 to november 2025) 1751kg of vegetables.

Vegetables	Kg	COST (\$)
Amaranth	422	621
Spinach	27	71
Okra	108	11
Eggplant	198	48
Parsley	135	16
Celery	135	16
Cucumber	66	16
Lettuce	110	13
Scallion	66	16
Carrot	66	19
Black Nightshade	418	67
Total	1751	914

We organised Vegetable salad day on 16 october , in World food day.

The pupils sold some of their vegetables during the year and earned 914 \$. This money will allow them to buy vegetable seeds and renew their agricultural tools.

The drinking water well was drilled at the Yamboro school.

The donate are important to continue our project.
