ABOUT US:

Hope for Youth-Uganda (H4YU) is a registered local NGO operating in rural communities of Nama and Kyampisi sub-counties of Mukono district with Registration number 5058; file #. S.5914/5415)

Our Organisation Started in March 2008 with seven Children under a tree, H4YU now provides free Primary education to over 250 vulnerable children of between 6-14 years and sponsors over 50 youths (majority girls) in high schools. We also provide support services to grandmothers / guardians who look after most of these children in their homes.

Our mission is to improve the quality of life for vulnerable children and young adults in our communities and beyond by empowering them through provision of free basic primary and vocational education, access to health care services and community outreach; while restoring hope in them.

H4YU is a Christian-based organization but does not discriminate in anyway whatsoever.

The ultimate aim for Hope for Youth Uganda is community development through self-sufficiency and ensuring that our development work is sustainable.

H4YU Basically has Six(6) Thematic Interventional Areas

- a)** Children/ Youth Education Program
- b)** Youth Out-Of-School Holiday/ Weekend Programs
- c)** Girls Empowerment ("You Matter")
- d)** Grandmothers and Nutrition
- e)** Water and Basic Community Health Services
- f)** Income Generating, Self-Sustenance Projects.

VOCATIONAL SERVICES

H4YU aims to set up a fully-fledged vocational center that will provide learning opportunities for young girls and boys. This center will provide sewing/tailoring, Bakery, Crocheting, Computer studies and Agricultural classes, Brick laying, Carpentry and Mechanical (Vehicles) training for girls and women as well as boys. The vocational center is intended to provide income generating activities to these boys and girls so that they become self-reliant and give back to the organization hence ensuring sustainability.

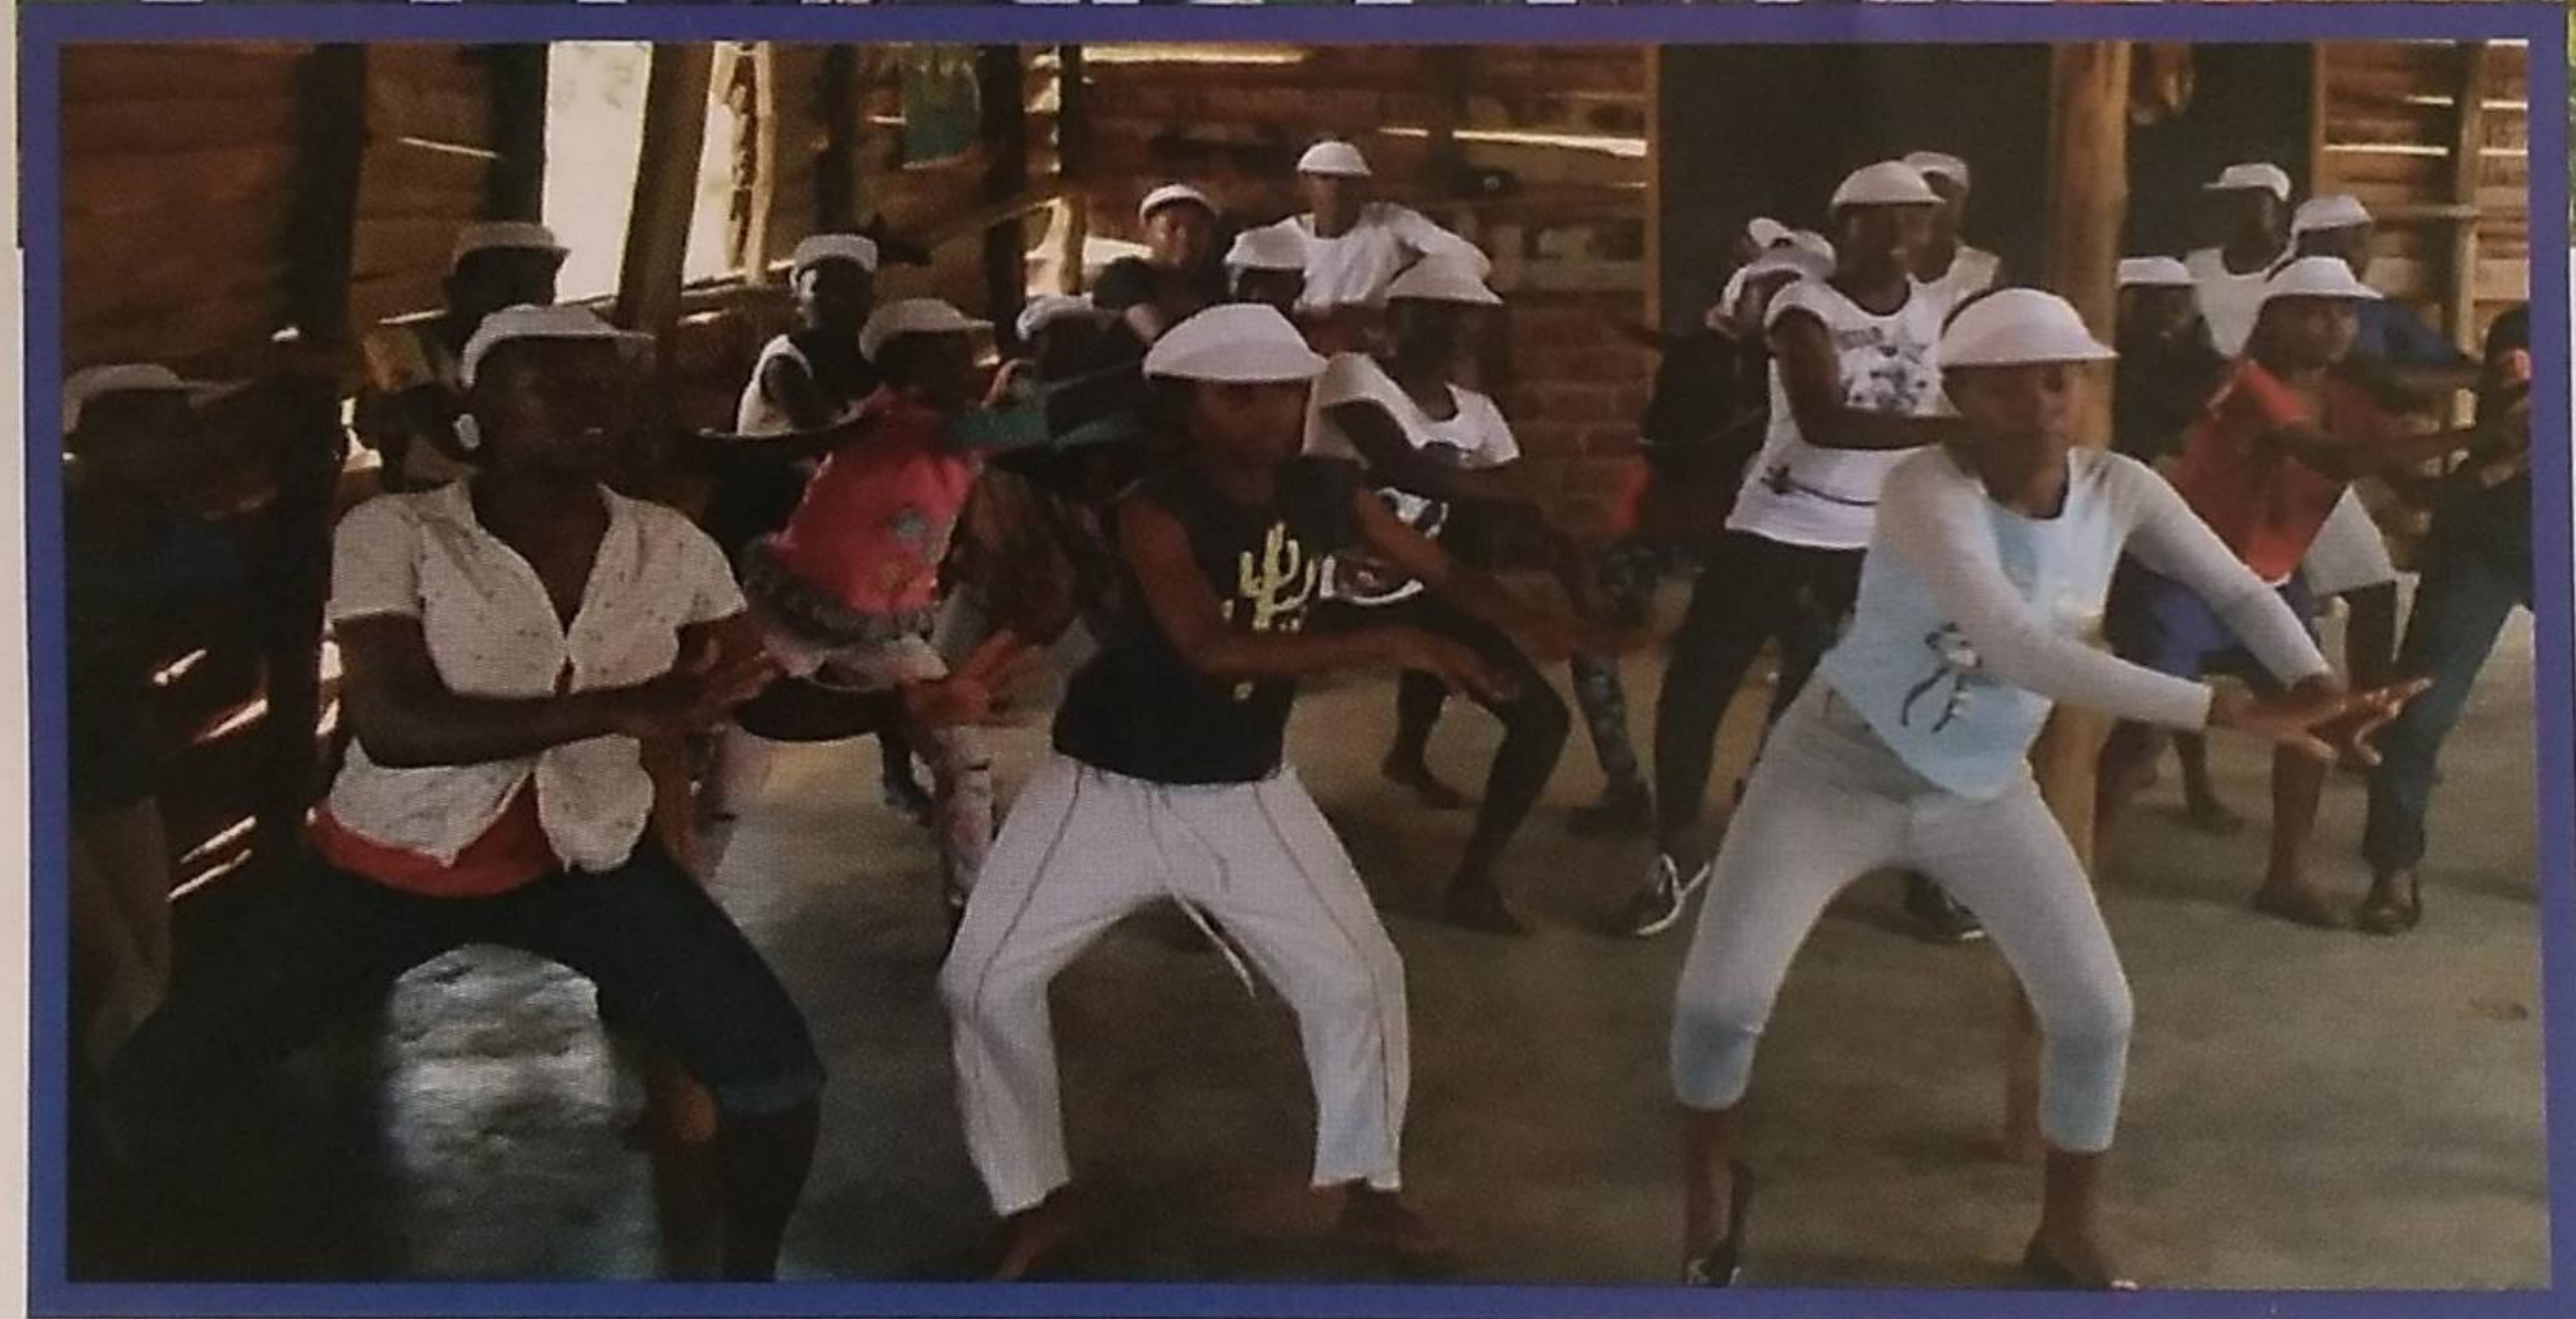

GIRLS EMPOWERMENT (YOU MATTER GIRLS CLUB)

We encourage girls to complete their education through H4YU support. We believe that women and girls can be important catalysts for change and empowering them through education, skills training, improved health care or set up of small businesses can improve their future opportunities. H4YU provides opportunities for training of girls and young mothers through vocational education focused exclusively on the betterment and economic uplift of these girls and young mothers. Making of marketable products along with skilled trainers, they are able to gain full set of skills thus empowering them to make a reasonable income leading to economic development for the girl and their families.

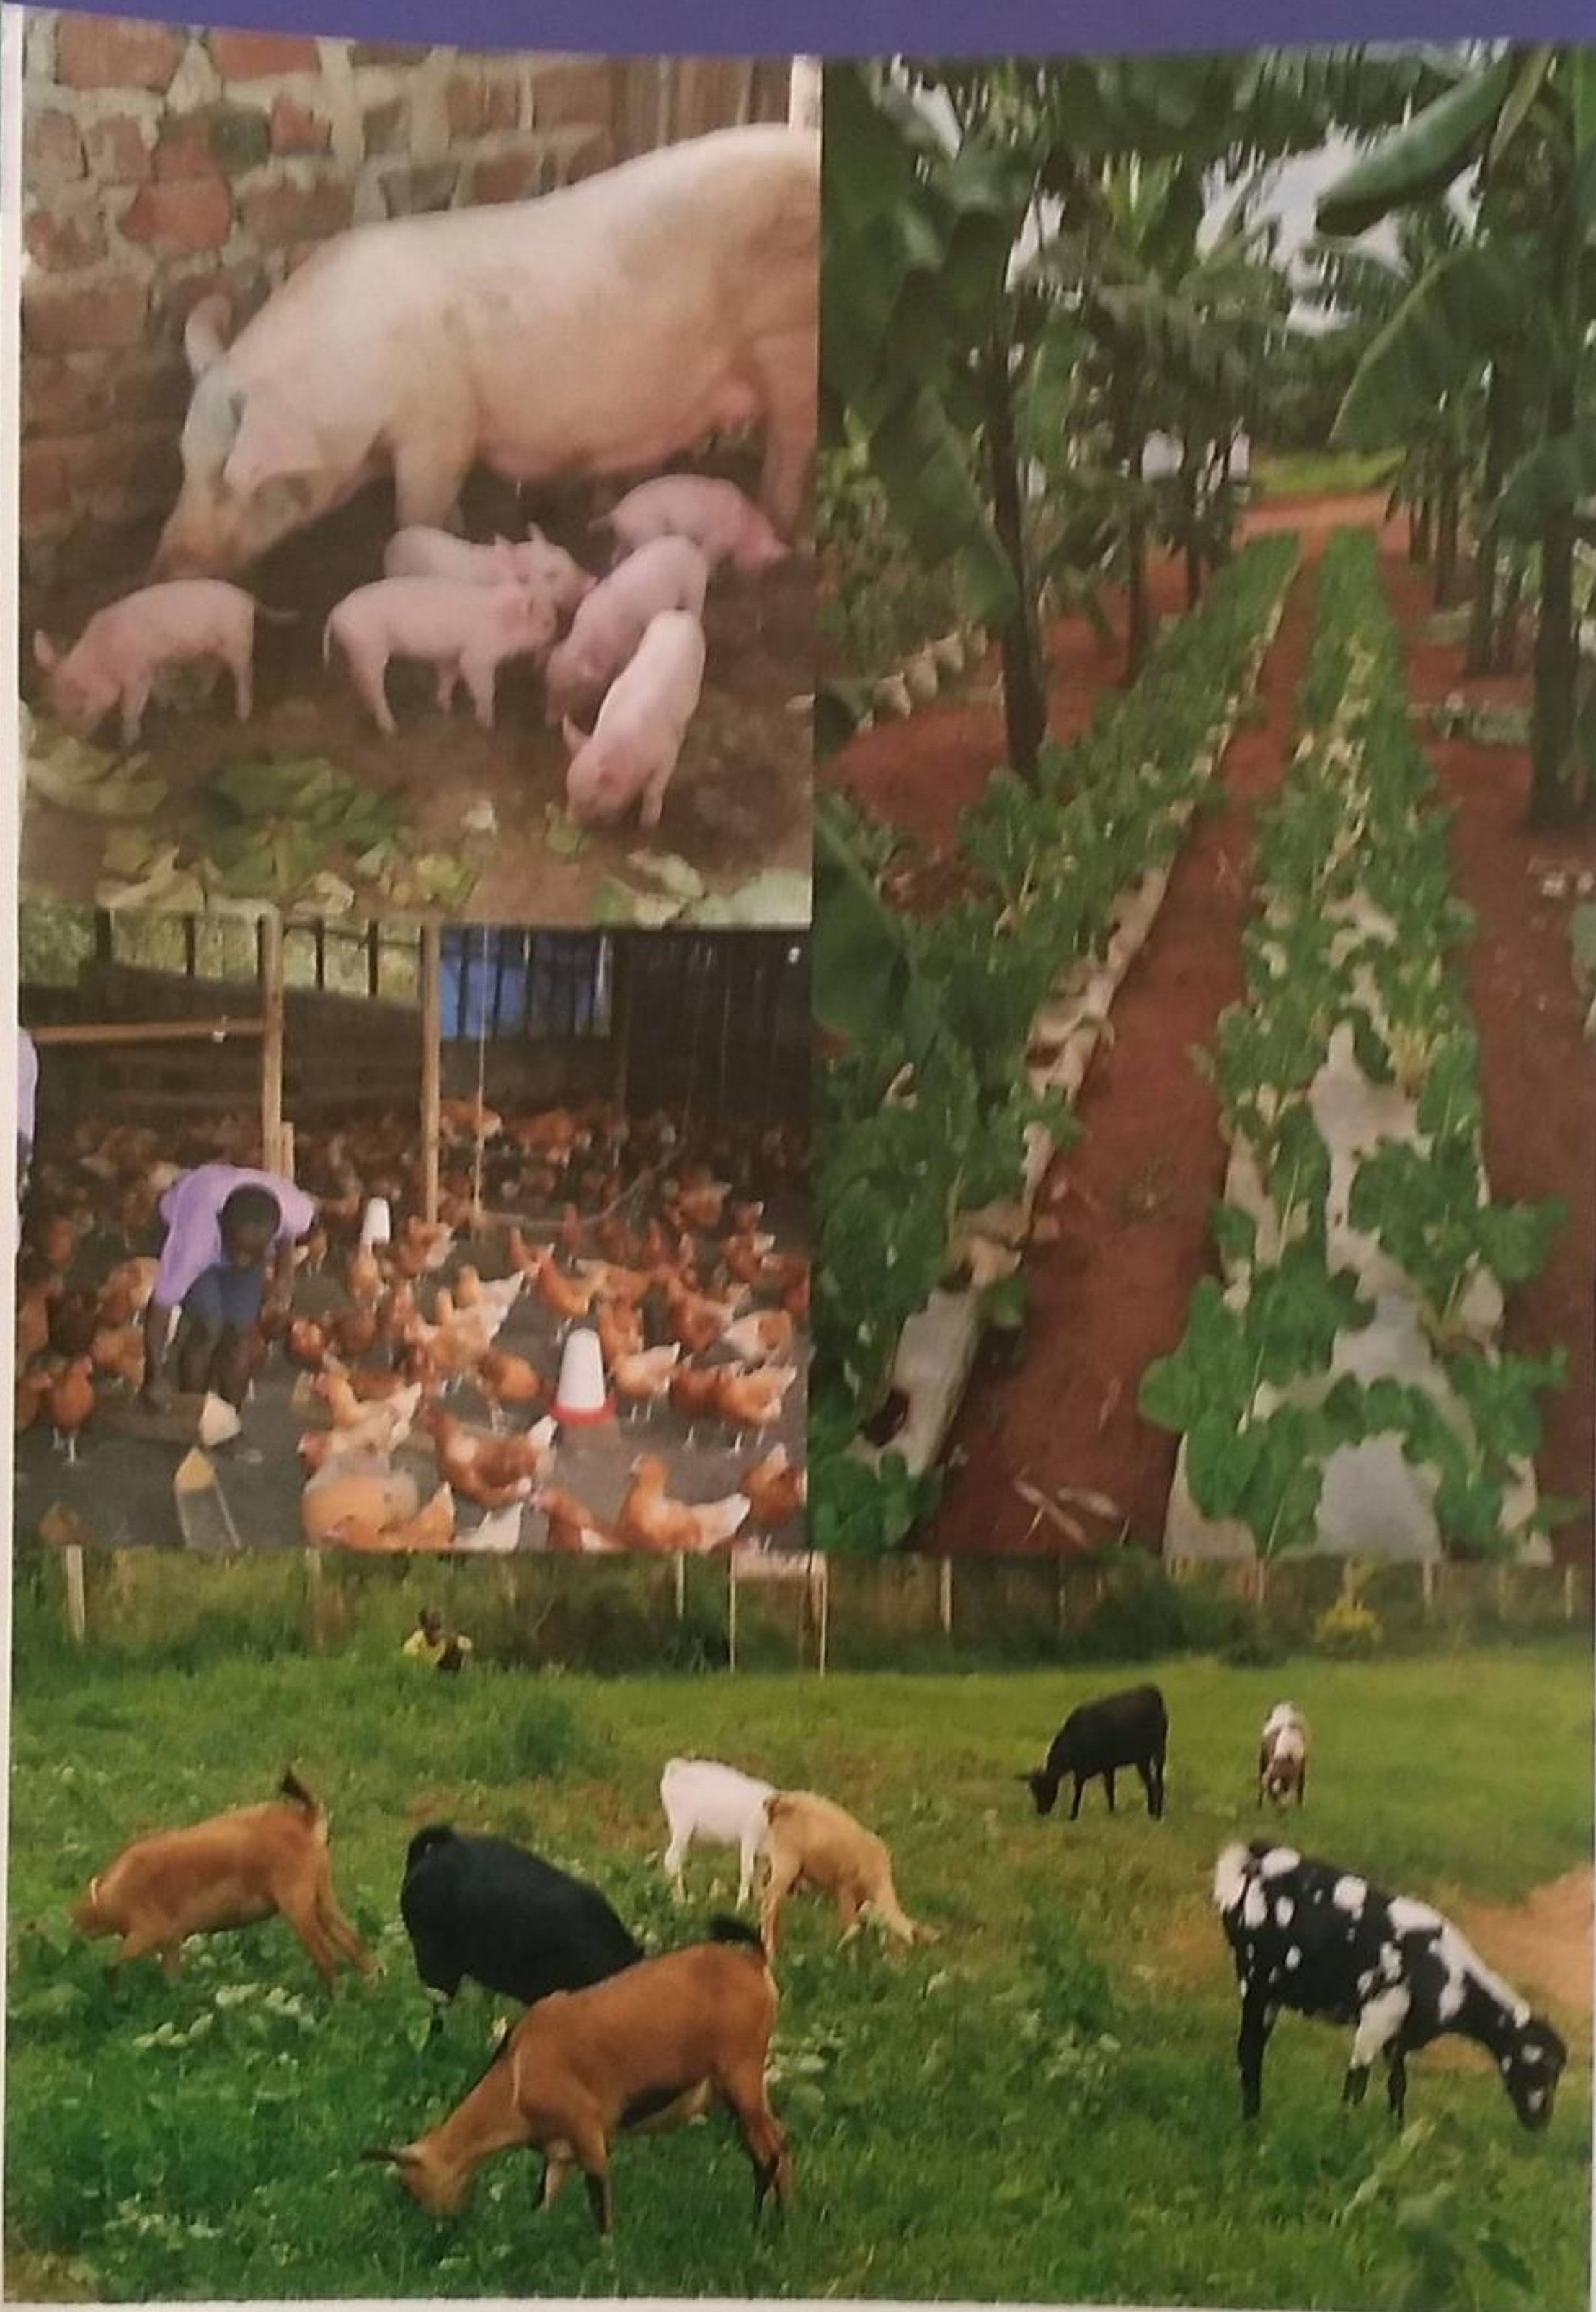

Youth Out-Of-School Holiday/ Weekend Program

The youth – out-of-school project is designed to provide educational and emotional support for young people. We use sport, music and performances to create a forum for young people to tell stories, share experiences and build self-confidence. It acts as a mobilizing tool for identification of key local volunteers and a delivery mechanism for HIV/AIDS education and prevention strategies. Competitions among youths within their community villages and schools, offer the opportunity to engage them in activities that build their knowledge and skills to protect themselves from disease infections.

Income Generating Activities

H4YU has the desire and determination to become an independent ongoing, viable and Self-reliant organization. We manage a humble poultry project and a piggery for feeding children and raise an income that would cater for some administration costs. We also wish to expand on the existing small food crops and fruits farms, which cater for feeding the children and staff at school. We have of recent started keeping goats and rabbits too.
