

From the periphery to the future: technology as a bridge for transformation

Nowadays, almost all job opportunities require basic knowledge of technology. But not everyone has access to the necessary training to compete fairly.

Rede Cidadã offers technical training combined with socio-emotional development, creating real opportunities for young people from the periphery who want to enter and grow in the labor market.

“The project changed my life. It opened doors to knowledge, opportunities and personal achievements.”

Micaele*, participant in the Start Project in the city of Recife (PE)

Micaele was part of the Start Project, an initiative that has already prepared and integrated more than 1,400 young people in vulnerable situations into the labor market.

“I am very grateful to everyone who has been and still is part of Rede Cidadã. The support and welcoming were extremely important! Whenever new classes open, I share and recommend it to other people to register as well.”

We invite you to donate any amount

With a monthly contribution, you help more young people gain access to technology, training, and new opportunities. Join this successful initiative that has changed the lives of many young Brazilians who just need an opportunity to leave poverty behind.
