

December 27, 2022

Dear friends,

Thanks to the contributions received throughout this time through GlobalGiving, we contributed to training two young people to boost their professional futures. During this period, we train:

- **Dora**, from the state of Tabasco, received training in Office, new technologies, job search tools, social security, and digital marketing.
- **Joselyn**, from the Estado de Mexico, received training in soft skills, innovation, and continuous improvement.

In addition, thanks to other individual and business allies, who also joined this cause with direct contributions to Fundación ProEmpleo, it was possible to train 4 more people for this project:

- **Yoreley**, from Baja, California, was trained in tools for job search, social security, and digital marketing.
- And three more young people who were equally trained in soft skills, innovation, and continuous improvement tools. They are **Miguel**, from Aguascalientes; **Daniela**, from Mexico City; **Alexis**, from Estado de Mexico.

With these 6 young people trained, we have reached 40% of the goal we have set out to achieve with this project. We invite you to continue contributing so that more young people continue strengthening their skills to build a better future through decent and well-paid employment.

As always, we'll keep you informed of any progress. We thank you for keeping abreast of our projects.

Kind regards,

Patricia Larios
Executive Director
