

# LIGHTING UP THARPARKAR

A progress report submitted to Global Giving by Network for Human and Social Development

22 May 2023

Network for Human and Social Development was disbursed \$20000 by Global Giving for a project focusing on flood relief activities. NHSD began working in Tharparkar, finishing construction of twenty-five homes, a vocational training center, a dispensary, and a school in Mithrio Charan and Mithrio Suttar, Chachro, District Tharparkar. A second disbursement was done in March 2023 of \$25000. This amount was used to integrate solar panels on the already constructed houses as well as the vocational training center, dispensary and the school.

The NHSD M&E team accompanied the solar panel team towards Tharparkar. The houses had already been identified by NHSD Project Coordinator Tharparkar, and the same houses have also been marked on the basis of the solar panels which have been installed on their houses. These houses will also be marked with metal plaques to identify the donors who had caused this benefit for the community.

The photos are attached as Annex A. It also includes the location of each house as well as pictures of the installation. Twenty-five homes had solar panels installed on them, and the locations allow for verification.

The net beneficiaries of this endeavor are the communities of Mithrio Charan and Mithrio Suttar. By introducing electricity to the people, they now have access to electricity sources which are independent of the national grid. This further allows them to improve their houses through various electrical and mechanical interventions (e.g., internet, basic electrical appliances, refrigeration, freezer). This also becomes important because by having ample electricity, they can now gain access to other sources of livelihood. NHSD plans on introducing computer-based courses to the people of this village, which will allow them to have better accessibility and overall significant upward social mobility. These courses will be very basic, keeping in mind the overall illiteracy in the area.

These technical training courses will include:

## Basic Courses

- Textile Designing
- Accessing the Internet and principles of research
- Basic Principles of Youtube
- The use of Google Products
- Online platform usage – Whatsapp online, Zoom.

## Advance Courses

- Graphic Designing
- Content Writing
- Basic English Composition
- Basic Urdu Composition
- Mobile Phone Repair
- Setting up microfinance Business (e.g., Easypaisa)

However, these courses will be adapted in accordance with the social and cultural aspects of the community.

The sustainability of the project will also be guaranteed because the community has made an agreement on the maintenance and management of the solar panels.
