

Mujeres de Frente

Support the education of 40 women in Quito

Report - July 2024

Our School for Feminist Popular and Political Education began a new cycle in march of 2024. We are in the process of becoming *popular educators* based on Paulo Freire's methodology.

Participants are learning how to guide group activities which focus on active listening, thrust and building bonds of care among women.

Alongside the main purpose of the school, which this year is to form *popular educators*, we also have a space for improving reading and writting skills. This space is open for everyone.

Meet our kids

While the mothers or main caregivers are part of our **School for Feminist Popular and Political Education**, their kids have a safe space of their own. The 'Espacio de Wawas' is a dedicated spaces only for activities with kids and adolescents. There are always people from the organization who accompany them, but we follow a non-directive methodology. Kids and adolescents can chose which activities they would like to be a part of.

Thank you for believing in our process!
