

# Mujeres de Frente

## Support the education of 40 women in Quito

Report - December 2024

Our School for Feminist Popular and Political Education began a new cycle in march of 2024 and is ending it now in December. In the coming year we will delve deeper into becoming *popular educators*. In this school edition we learned the basics of how to guide group activities, focus on active listening, and building care bonds among women.

Part of becoming popular educators means being able to guide participants through activities that foster trust. At the beginning of each encounter, our educators learned how to talk participants through such activities.

### Meet Elizabeth & Andrea

We believe that being popular educators and women leaders means taking spaces that were otherwise not open for women of popular sectors.

In this photo Elizabeth is taking, alongside Andrea, at a conference in Univesidad Politécnica Salesiana, where she explained the human rights violations that are happening inside prisons in Ecuador and anlyzed the causes and consequences for the inmate population.

**Thank you for believing in our process!**
