

# Mujeres de Frente

## Support the education of 40 women in Quito

Report - November 2025

In the second half of the year, our *School for Feminist Popular and Political Education* set out to deepen our focus on leadership and on the skills each *compañera* needs to become a popular educator and facilitator. This path led us to open our doors to different organizations, collectives, and individuals who accompanied and enriched the process with their knowledge.

At *Mujeres de Frente*, we understand education as an exchange that grows from the experiences and knowledge of each *compañera*. For that reason, rather than imposing external content, we aim for the learning process to respond to their own interests.

### Educators

Training process found new routes beyond Quito. Thanks to our alliance with *Comadres* -an organization that defends the sexual and reproductive rights of women and dissident identities- groups of educators traveled to different parts of the country. There, they facilitated workshops, exchanged learning experiences, and connected directly with the work of allied organizations. These journeys strengthened their confidence as educators.

Thank you for believing in our process!
