

Health Fund: Report 6 on the activities of project 58481 on the health of members of TIGOUNG NONMA -2024

I Introduction

During this period, the fund helped support the health of three TN patients, one of whom is mentally ill and the other has a fracture and one who suffers from sickle cell anemia and blood pressure. Note that Tigoung Nonma received sad news which is the death of a daughter of a member of the TN.

II Activities carried out

A statement of financial support and travel and consultation of the three beneficiary members for their health was established.

Given the low mobilization of this fund, TN prioritized the care of these three beneficiaries, all women, because their cases were more serious.

- One suffers from mental illness, both parents are deceased and only one married sister who often comes to her house to take care of her;
- Another suffers from a fracture in her right arm and is hospitalized
- And the other suffers from sickle cell anemia, she is pregnant and had a blood pressure crisis Chronic.

III Difficulties encountered

The funds received did not make it possible to care for all the patients.

IV Results achieved

The financial support contributed to improving the health of the three beneficiary patients;

V Perspective

Always mobilize funding to be able to support sick members;
 Encourage all sick people to go to health centers to obtain medical documents to be treated;

VI Financial Report (Summary)
