

Detailed Report & Funding Appeal

Project Name: **Water4Life** – Nepal Safe Drinking Water Initiative

Implementing Organization: Al Ehsan Charitable Foundation Nepal

Milestone Achieved:

With immense gratitude to our generous donors, we have successfully completed 100 water installations (hand and electric pumps) across underserved regions of Nepal. These life-saving water sources are now benefiting hundreds of families, reducing disease, and restoring dignity.

The Need Isn't Over:

As we celebrate this major milestone, 17 more urgent requests from water-deprived villages remain. These communities still struggle daily—children walk miles, women wait hours, and the water they gather is often unsafe.

Urgent Appeal:

We now need to install:

15 Hand Pumps (\$180 each)

2 Electric Pumps (\$500 each)

Total Needed: 17 water systems

These 17 points will provide clean water to over 1,500 additional people, including children, elderly, and people with disabilities.

How You Can Help:

Sponsor 1 Hand Pump: \$180

Sponsor 1 Electric Pump: \$500

Contribute any amount to help us complete this final phase.

Donate Now via Global Giving:
