## Executive Summary

The Water4Life Project aims to provide safe drinking water through hand pump installations in underserved communities across Nepal. This report presents the project's progress, impact, and key outcomes.

## Project Background

Many rural communities in Nepal lack access to clean drinking water, leading to various health issues and significant hardship. The Water4Life Project directly addresses these challenges by providing sustainable and accessible water solutions.

## Objectives

- Provide clean and safe drinking water to underserved communities.
- Reduce the prevalence of waterborne diseases among the project beneficiaries.
- Improve overall hygiene practices within targeted communities.
- Support vulnerable populations, including women and children, by reducing their daily burden of water collection.

## Project Details

- **Project Name:** Water4Life
- **Location:** Sunsari, Morang, Siraha, Saptari Districts, Nepal

## Implementation Methodology

The project follows a structured implementation methodology to ensure effectiveness and sustainability:

1. **Needs Assessment:** Comprehensive assessment to identify communities with the greatest need for clean water access.
2. **Site Selection:** Careful selection of appropriate installation sites based on hydrogeological surveys and community consultations.
3. **Drilling and Installation:** Professional drilling and installation of high-quality hand pumps by experienced technicians.
4. **Water Quality Testing:** Rigorous testing of water samples to ensure compliance with national and international standards.

5. **Community Handover:** Formal handover of the completed project to local community committees with training on maintenance and operation.

## Achievements

- **Total Pumps Installed:** 101
- **Ongoing Projects:** 0
- **Total Beneficiaries:** 2600

## Financial Report

Funds Received	Funds Utilized
20,215 USD	20,215 USD

## Impact

The Water4Life Project has had a significant positive impact on the beneficiary communities:

- **Improved Health Outcomes:** Reduction in waterborne diseases, leading to healthier lives.
- **Reduced Burden on Women and Children:** Less time spent collecting water, allowing for education and other productive activities.
- **Improved Sanitation and Hygiene:** Increased awareness and adoption of better sanitation practices.
- **Increased Productivity:** Healthier communities are more productive, contributing to economic growth.

## Challenges

The project faced several challenges during implementation:

- **Remote and Inaccessible Areas:** Difficulty in accessing remote communities due to poor infrastructure.
- **Adverse Weather Conditions:** Disruptions due to heavy rainfall and flooding.
- **Rising Material and Transportation Costs:** Increased project expenses due to inflation.

## Sustainability

To ensure the long-term sustainability of the project:

- **Community Ownership:** Establishment of local water management committees responsible for the operation and maintenance of the hand pumps.
- **Maintenance Training:** Provision of training to community members on basic hand pump repair and maintenance.
- **Regular Monitoring and Evaluation:** Ongoing monitoring of water quality and project performance to identify and address any issues.

• **Beneficiaries:**

## Testimonials

*"We did not have a hand pump for drinking water, which made life very hard. Alhamdulillah, now we have one. May Allah reward everyone who made this possible. Ameen." – Beneficiary*

## Conclusion

The Water4Life Project has made a meaningful and lasting impact on the lives of thousands of people in underserved communities across Nepal. Al Ehsan Charitable Foundation Nepal is committed to continuing and expanding this vital work to reach even more people in need.

## Acknowledgement

Al Ehsan Charitable Foundation Nepal extends its deepest gratitude to all the donors, partners, and volunteers who have contributed to the success of the Water4Life Project. Your support has made a profound difference in the lives of countless individuals and families.

## Appeal for Support

Access to clean water is not a privilege—it is a basic human need. Thousands of families in rural Nepal still struggle daily to find safe drinking water. With your support, we can install more hand pumps and bring life-changing relief to these communities.

Your contribution, no matter the size, can provide clean water, improve health, and restore dignity. Join us in making a lasting impact.

**“Donate today and be a part of this goodness”.**
