

THE SCHOLARSHIP INSPIRED HIM TO BE THE BEST IN HIS CLASS

This time, we bring you Abel's story. He is 15 years old and studies at the Amaicha del Valle Agricultural Technical School. When he graduates, the main objective of the Future Graduates Program, which León implements with your support, will have been achieved.

"I joined León's scholarship program two years ago. I was very nervous because of what a scholarship means for my studies. I was lucky enough to get it, and I just focused on keeping it and improving academically. In fact, I set out to get the best grade point average to keep the scholarship, and that's something I've been achieving. You could say I'm a good student," says Abel, excited and happy to be approaching his goal.

"I am very grateful to León and to all those who believe in my future through the program. The support that all scholarship recipients receive is extremely important for our student community," he emphasizes.

Let's continue working together to improve the future of the young people who need it most!
