

## WE ADD MORE SCHOLARSHIPS, MORE EDUCATION

Our goal is to promote the academic and personal success of young people in vulnerable situations, guaranteeing an education that opens doors to the future. We do this through comprehensive, personalised intervention based on strengthening socio-emotional skills and providing financial support.

During March and April, we enrolled 45 new students in nine institutions.

Regular activities included individual interviews and group workshops for the identification and development of socio-emotional skills.

Special activities:

- 30 scholarship recipients participated in training on personal finance.
- The teenagers participated in the 23rd León Anniversary, visiting Israel Park and planting trees, along with other municipal and civil society actors.
- A visit was made to the Horco Molle Experimental Reserve in Yerba Buena, including a tour of the Botanical Garden and learning about the local flora and fauna.
